

AMERICANS WITH DISABILITIES ACT TRANSITION PLAN

FOR CURB RAMPS AND SIDEWALKS

2021

LEON COUNTY

DEPARTMENT OF PUBLIC WORKS

DIVISION OF ENGINEERING SERVICES

INTRODUCTION

The goal of the Americans with Disabilities Act (ADA) Transition Plan for Curb Ramps and Sidewalks of Leon County is to ensure that the County creates accessible paths of travel in the public right of way for people with disabilities.

This Transition Plan describes Leon County Code requirements and Leon County Public Works Department's policies and programs to enhance accessibility in the public right of way. The funding for ADA accessible ramps and sidewalks is available through different programs and Capital Improvement Projects (CIP).

- Capital Projects for New Construction: Work involves creating new public rights-of-way will provide accessible features in the project area that meets current design standards.
- Capital Projects for Alterations: Work that under the ADA would be considered an alteration of existing public right-of-way will provide new and upgrade existing accessible features in the project area to meet current design standards.
- Maintenance and Repair Projects and Programs: Work that specifically addresses spot areas that are limited to normal maintenance and repairs in the public right-of-way will maintain accessibility of the public-right-of-way.

Leon County adopts Florida Department of Transportation (FDOT) Design Standards, Florida Greenbook, and Public Rights of Way Accessibility Guidelines (PROWAG) for the sidewalk design and construction.

TRANSITION PLAN HISTORY AND OVERVIEW

The data collection for the existing pedestrian facility locations, types, and associated information started in 2013 through multi-agency cooperation and corroboration. Based on the current data, Leon County maintains more than 65 miles of pedestrian walk paths including sidewalks and crosswalks. The sidewalk widths range from four to eight feet dependent upon the sidewalk location relative to the vehicular travel lane, available rights of way, and the age of the sidewalk.

The sidewalks have been built under the transportation projects, new developments, or the sidewalk program.

Section 10-7.529 of the Leon County Code requires

“Within the urban services area, new development shall be designed and constructed to facilitate pedestrian mobility in and between residential developments; between residential

development and nearby businesses, recreational opportunities, and community facilities; and, to connect places of business to one another and to residential developments.”

“New development shall be designed to implement a pedestrian mobility system that facilitates access to residential development, business establishments, community facilities and other nonresidential land uses, and, provides safe and convenient linkage between developments and between the public and private street system.”

Leon County began installing sidewalk ramps in the early 2000s for the major transportation projects when curbs and gutters are used.

I. CAPITAL PROJECTS FOR NEW CONSTRUCTION

On April 28, 2015, the Board of Leon County Commissioners adopted revised Policy No. 13-1, entitled “Sidewalk Eligibility Criteria and Implementation”, approved Safe Routes to School and Community Sidewalk Enhancements Tier Prioritization Lists, and approved the development of the FY 2016 budget to continue allocating funds from the County’s Sales Tax dollars for the sidewalk program (Attachment #1). In addition to these new sidewalks with designated funding, the ADA compliant sidewalks are also included in the Road Improvements, Road Widening, and Road Construction projects.

All sidewalks designed and constructed are in compliance with the ADA requirements and according to the latest engineering standards. When exception is required for the sidewalk construction because of the limited rights of way, extreme site conditions, or other constraints, Leon County will follow PROWAG to document the exception warrant.

II. CAPITAL PROJECTS FOR ALTERATIONS

The sidewalks and curb ramps are always considered to be built under Intersection Improvements and Road Reconstruction Capital Improvement Projects. The curb ramps are added, repaired, or rehabilitated under resurfacing projects according to the Department of Justice/Department of Transportation Joint Technical Assistance on the Title II of the Americans with Disabilities Act Requirements to Provide Curb Ramps when Streets, Roads, or Highways are altered through Resurfacing (Attachment #2).

III. NEW SUBDIVISION DEVELOPMENT

Section 10-7.529 of Leon County Code requires

“Along adjacent streets and rights-of-way. Within the urban services area, all new development, as well as reconstruction, expansion, and extension, as defined in article VI, division 3, shall provide sidewalks along all public and private streets adjoining the development.”

For those developments where sidewalks cannot be located within the public right-of-way, the developer must provide and record in the public records of Leon County, Florida, all easements necessary to guarantee public access to the sidewalk.

All sidewalks must be designed and built in compliance with the current ADA requirements and design standards.

IV. MAINTENANCE AND REPAIR PROJECTS AND PROGRAMS

Upon the citizens’ requests or during the sidewalk repair, curb ramps and truncated dome mats are added or rebuilt if deficiency is identified. Based on budget availability, Leon County Operations Division does repair work to correct the identified deficiencies such as trip hazards to ensure pedestrian safety.

V. CURRENT SIDEWALK INVENTORY

An inventory database has been established for the pedestrian facilities either owned or maintained by Leon County (Attachment #3). The database includes the locations, surface treatment types, type of the pedestrian walkways, widths, installation year, lengths of the segments, and responsible maintenance agencies. This database is constantly under review for quality assurance (QA), quality control (QC), and completeness while being updated to include new pedestrian facilities added to the County Rights of Way.

The Engineering Services Division worked with the Leon County GIS team to develop a sidewalk inspection and inventory system to survey and inspect the sidewalks for ADA compliance. This program uses a systematic approach to inspect the sidewalks in the field based on the latest FDOT standards and ADA requirements. Any deficiency identified will be located, recorded, and entered into the on line database using a mobile device in real time. An example of the sidewalk inspection and checklist is shown in Attachment #4.

Trimble R1 GNSS Receiver is used along with a mobile phone or tablet to increase accuracy

of the deficiency location (Attachment #5). The collected data is transferred from GIS databased to Infor Public database for Operations review and budget development for maintenance and repair. This sidewalk inspection and inventory process is considered a long term program based on the available resources.

VI. CURB RAMPS

Since the early 2000s, Leon County Public Works started evaluating the existing sidewalks before each resurfacing project for curb ramp deficiency. The curb ramps would be added, repaired, or rehabilitated according to the latest ADA requirements and engineering standards when identified and included as part of the resurfacing scope.

For intersection improvements, road reconstruction, and road widening, the pedestrian mobility and accessibility are always considered. The sidewalk and curb ramp addition, reconstruction, repair, and rehabilitation are included in the project scope and implemented according to the ADA requirements and latest engineering standards.

VII. METHODS TO CORRECT DEFICIENCIES

Dependent on the type of deficiencies, the correction methods may include but not limited to concrete surface grinding to remove trip hazards, concrete slab jacking (lifting) to create ADA compliant surface, replacement or addition of the truncated dome, crack repair with concrete or other fillers and bonding materials, obstruction removal, pedestrian crosswalk re-stripping, handrail installation for drop-off mitigation, back slope reconstruction, tree root pruning, curb ramp reconstruction, and sidewalk reconstruction.

All correction methods follow FDOT Design Standards and Specifications to ensure the final product meeting ADA requirements.

VIII. SCHEDULE OF CORRECTIONS

It is planned to have minimum one mile of sidewalk to be inspected annually from October through January. The identified deficiencies will be entered into the GIS database and be shared with Leon County Division of Operations for planning and budget preparation. The actual deficiency correction will start in October of each year and be completed by the end of September in the following year. The new Sidewalk Inventory and Inspection program started in October 2018 with the anticipated correction work in fiscal year 2019-2020.

Based on the available resources for inspection and funding, the Correction Schedule may be adjusted accordingly.

The Leon County Division of Operations started the trip hazard elimination in 2020 independently from the Sidewalk Inventory and Inspection by Division of Engineering Services and the summary of trip hazard mitigation work through June 2021 is shown in Attachment #6. It is anticipated to align the sidewalk repair work by Operations Division with the inspection work by Engineering Services Division during the budget request process. The most recent inspection and inventory data is shown in Attachment #7.

IX. RESPONSIBLE INDIVIDUAL

The official responsible for implementation of the County's ADA Transition Plan for Curb Ramps and Sidewalks is

Charles Wu, P.E., Director of Engineering Services

Division of Engineering Services

Leon County Public Works

2280 Miccosukee Road

Tallahassee, FL 32308

Telephone: (850) 606-1500

Fax: (850) 606-1501

Web Site: <http://cms.leoncountyfl.gov/>

X. PUBLIC INPUT

Leon County posts the Transition Plan at the County's web site for public review and comments. The Transition Plan is a living document and will be updated periodically based on the public input and new regulatory requirements.

Board of County Commissioners Leon County, Florida

Policy No. 13-1

Title: Sidewalk Eligibility Criteria and Implementation

Date Adopted: April 28, 2015

Effective Date: April 28, 2015

Reference: N/A

Policy Superseded: N/A

Policy No. 13-1, Sidewalk/Bikeway Provision Selection Criteria, adopted by the Leon County Board of County Commissioners on July 9, 2013, is hereby retitled “Sidewalk Eligibility Criteria and Implementation” and amended to read as follows:

It shall be the policy of the Board of County Commissioners of Leon County, that:

- A. Criteria: The following Criteria shall be utilized to evaluate the proposed sidewalks/bikeways, subject to the availability of funds:
1. Included in the Safe Routes to School list adopted by the Capital Region Transportation Planning Agency (CRTPA) Board (SRTS)
 2. Routes to parks
 3. Connectivity of a neighborhood to an existing bike route or trail; connections need to be within ¼ mile
 4. Completing a gap (less than ¼ mile in length) between existing pedestrian/bike facilities
 5. Addresses a bike or pedestrian safety issue in an area with documented demand
 6. On an arterial or collector roadway
 7. Located inside the Urban Service Area (USA)
 8. Donation of right of way
- B. Project Categories: Sidewalk projects approved by the Board for construction utilizing County funding (Approved Sidewalk List) shall be classified as either SRTS or Community Sidewalk Enhancements. SRTS projects shall be those included in the SRTS list adopted by the CRTPA Board. Community Sidewalk Enhancements shall be all non-SRTS projects.
- C. Funding: Through the annual budget process and five-year capital improvement plan, 60% of total County sidewalk funds shall be allocated to SRTS projects and 40% shall be allocated to Community Sidewalk Enhancement projects. Staff is authorized to adjust this allocation during the year as projects and funding needs progress toward and through construction. However, the 60%/40% distribution shall be maintained over the five-year period, unless otherwise approved by the Board.

**Sidewalk Eligibility Criteria and Implementation
Policy No. 13-1**

D. Prioritization Tiers – SRTS and Community Sidewalk Enhancements projects included on the Approved Sidewalk List shall be separately categorized as a Tier 1, Tier 2, Tier 3 or Tier 4 project (Priority Tier), in accordance with the definitions set forth in Table #1 below, for the purposes of prioritizing Leon County funding, program design, permitting and construction.

Table #1: Sidewalk Priority Tiers		
Tier¹	Safe Routes to School – Priority Tier Definitions	Community Sidewalk Enhancements – Priority Tier Definitions
1	Meets no less than 4 of the criteria	Meets no less than 4 of the criteria
2	Meets 3 of the criteria	Meets 3 of the criteria
3	Meets 1 to 2 of the criteria	Meets 1 to 2 of the criteria
4 ²	Meets no less than one of the criteria, however one side of the street has an existing sidewalk	Meets no less than one of the criteria, one side of the street has an existing sidewalk
¹ Priority Tiers, with Tier 1 being the highest priority level and Tier 4 the lowest priority level.		
² Unless the Board specifically directs otherwise, once a roadway has a sidewalk on one side of the street, the priority for placing a sidewalk on the opposite side of the street for the same segment shall automatically be reclassified as a Tier 4 project, if it remains on the Approved Sidewalk List.		

E. Additions to the Approved Sidewalk List - Staff shall evaluate new sidewalk segments proposed for construction within the unincorporated area of Leon County through the use of County funds. Those proposed new sidewalk segments that meet no less than one of the Criteria, as set forth in Section A above, shall be presented to the Board for its consideration. Only those sidewalk segments approved by the Board shall be included in the Approved Sidewalk List. Proposed new sidewalk segments that are located outside the USA, and not on the SRTS list, are not eligible for inclusion in the Approved Sidewalk List unless the Board makes an exception. The order by which construction occurs on specific projects shall be dictated by physical, design/permitting, and funding constraints.

F. Implementation of Approved Sidewalk List Projects - All projects within a given Priority Tier level shall be given equal priority with respect to funding and development activities. All Tier 1 projects shall be programmed through construction prior to staff beginning work on Tier 2 projects; all Tier 2 projects shall be programmed through construction prior to staff beginning work on Tier 3 projects; and all Tier 3 projects shall be programmed through construction prior to staff beginning work on Tier 4 projects.

With respect to sidewalk segments located on Florida Department of Transportation (FDOT) roadways that are on the Approved Sidewalk List, staff shall prepare plans and acquire permits in order to be able to better position/leverage other funds for the sidewalk construction. Once all the necessary permits have been obtained, the Board may or may not direct staff to proceed with the construction of a sidewalk on FDOT right-of-way.

G. Annual Status Report - Staff shall provide the Board with an annual status report on the sidewalk program. Such annual status reports shall include, but not be limited to, the status of funding allocations, including the distribution of funds between SRTS and Community Sidewalk Enhancements projects.

Department of Justice/Department of Transportation Joint Technical Assistance¹ on the Title II of the Americans with Disabilities Act Requirements to Provide Curb Ramps when Streets, Roads, or Highways are Altered through Resurfacing

Title II of the Americans with Disabilities Act (ADA) requires that state and local governments ensure that persons with disabilities have access to the pedestrian routes in the public right of way. An important part of this requirement is the obligation whenever streets, roadways, or highways are *altered* to provide curb ramps where street level pedestrian walkways cross curbs.² This requirement is intended to ensure the accessibility and usability of the pedestrian walkway for persons with disabilities.

An alteration is a change that affects or could affect the usability of all or part of a building or facility.³ Alterations of streets, roads, or highways include activities such as reconstruction, rehabilitation, *resurfacing*, widening, and projects of similar scale and effect.⁴ Maintenance activities on streets, roads, or highways, such as filling potholes, are not alterations.

Without curb ramps, sidewalk travel in urban areas can be dangerous, difficult, or even impossible for people who use wheelchairs, scooters, and other mobility devices. Curb ramps allow people with mobility disabilities to gain access to the sidewalks and to pass through center islands in streets. Otherwise, these individuals are forced to travel in streets and roadways and are put in danger or are prevented from reaching their destination; some people with disabilities may simply choose not to take this risk and will not venture out of their homes or communities.

Because resurfacing of streets constitutes an alteration under the ADA, it triggers the obligation to provide curb ramps where pedestrian walkways intersect the resurfaced streets. See *Kinney v. Yerusolim*, 9 F 3d 1067 (3rd Cir. 1993). This obligation has been discussed in a variety of technical assistance materials published by the Department of Justice beginning in 1994.⁵ Over the past few years, state and local governments have sought further guidance on the scope of the alterations requirement with respect to the provision of curb ramps when streets, roads or highways are being resurfaced. These questions have arisen largely due to the development of a variety of road surface treatments other than traditional road resurfacing, which generally involved the addition of a new layer of asphalt. Public entities have asked the Department of Transportation and the Department of Justice to clarify whether particular road surface treatments fall within the ADA definition of alterations, or whether they should be considered maintenance that would not trigger the obligation to provide curb ramps. This Joint Technical Assistance addresses some of those questions.

Where must curb ramps be provided?

Generally, curb ramps are needed wherever a sidewalk or other pedestrian walkway crosses a curb. Curb ramps must be located to ensure a person with a mobility disability can travel from a sidewalk on one side of the street, over or through any curbs or traffic islands, to the sidewalk on the other side of the street. However, the ADA does not require installation of ramps or curb ramps in the absence of a pedestrian walkway with a prepared surface for pedestrian use. Nor are curb ramps required in the absence of a curb, elevation, or other barrier between the street and the walkway.

When is resurfacing considered to be an alteration?

Resurfacing is an alteration that triggers the requirement to add curb ramps if it involves work on a street or roadway spanning from one intersection to another, and includes overlays of additional material to the road surface, with or without milling. Examples include, but are not limited to the following treatments or their equivalents: addition of a new layer of asphalt, reconstruction, concrete pavement rehabilitation and reconstruction, open-graded surface course, micro-surfacing and thin lift overlays, cape seals, and in-place asphalt recycling.

What kinds of treatments constitute maintenance rather than an alteration?

Treatments that serve solely to seal and protect the road surface, improve friction, and control splash and spray are considered to be maintenance because they do not significantly affect the public's access to or usability of the road. Some examples of the types of treatments that would normally be considered maintenance are: painting or striping lanes, crack filling and sealing, surface sealing, chip seals, slurry seals, fog seals, scrub sealing, joint crack seals, joint repairs, dowel bar retrofit, spot high-friction treatments, diamond grinding, and pavement patching. In some cases, the combination of several maintenance treatments occurring at or near the same time may qualify as an alteration and would trigger the obligation to provide curb ramps.

What if a locality is not resurfacing an entire block, but is resurfacing a crosswalk by itself?

Crosswalks constitute distinct elements of the right-of-way intended to facilitate pedestrian traffic. Regardless of whether there is curb-to-curb resurfacing of the street or roadway in general, resurfacing of a crosswalk also requires the provision of curb ramps at that crosswalk.

July 8, 2013

¹ The Department of Justice is the federal agency with responsibility for issuing regulations implementing the requirements of title II of the ADA and for coordinating federal agency compliance activities with respect to those requirements. Title II applies to the programs and activities of state and local governmental entities. The Department of Justice and the Department of Transportation share responsibility for enforcing the requirements of title II of the ADA with respect to the public right of way, including streets, roads, and highways.

² See 28 CFR 35.151(i)(1) (Newly constructed or altered streets, roads, and highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway) and 35.151(i)(2) (Newly constructed or altered street level pedestrian walkways must contain curb ramps or other sloped areas at intersections to streets, roads, or highways).

³ 28 CFR 35.151(b)(1).

⁴ 2010 ADA Accessibility Standards, section 106.5.

Sidewalk Field Inspection and Inventory Checklist

Submitted By: novakc from Engineering

Submitted Time: 08/13/2018 10:50 PM

Inspection Site: [Pedrick Rd - Locator - S3](#)

Should a ramp be added to this site (*currently one does not exist*)? Yes

Is a ramp present? Yes

Information on Current Ramp

Ramp Type	CR-A
Ramp Length	<72"
Ramp Width	<36"
Ramp Top Landing Width	<36"
Ramp Bottom Landing Width	<48"
Ramp Running Slope	<=8.3 %
Ramp Rise Height	4
What is the Ramp Counter Slope of the adjoining gutter/roadway?	<=5 %
Ramp Cross Slope	<=2 %
Slope of First Flared Side	<=10 %
Slope of Second Flared Side	<=10 %
Are the Truncated Domes complete and uniform in color and texture?	Yes
Are there 5 or more non-compliant Domes in any one square foot?	Yes
Are there 2 non-compliant Domes adjacent to each other?	Yes
Are Domes located more than 5 feet from the back of the curb or edge of pavement?	<=2" back from curb
Is the section of Domes at least 2 feet in length?	Yes
Are Domes located in the right position?	Yes
Notes	testing 123

30.4743804888889/-84.1823915833333

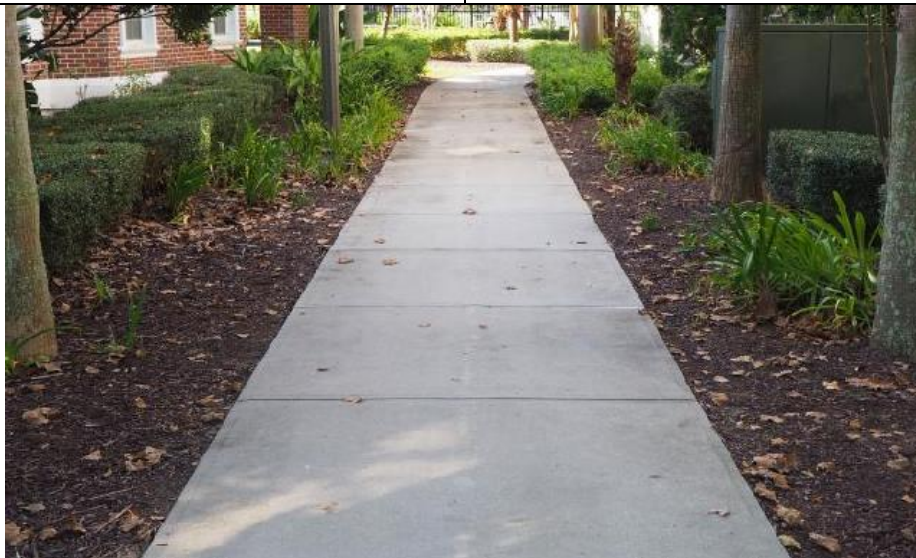

Should a sidewalk be added to this site (*currently one does not exist*)? Yes

Is a sidewalk present? Yes

Information on Current Sidewalk

Does the sidewalk have any defects such as cracks, settlements, horizontal shifts, etc.?	Yes
Does the sidewalk have any obstructions such as tree, power pole, mast arm, etc.?	Utility Pole: <32" , Sign Post: >=32" <48" , Trees/Vegetation: <32"
What is the width of the sidewalk?	<5'
Does the road segment have curb and gutter?	Yes
What is the maximum Running Slope in this segment of sidewalk?	<=8.3 %
What is the maximum Cross Slope in this segment of sidewalk?	<=2 %
Are there any Drop-off Hazards in this section of sidewalk that do not have fencing/handrail?	>10" drop w/in 24"

Change in Level	<= 1/4"
Horizontal Opening	<= 1/2"
Is there a Protruding Object?	Yes Sign Panel: Yes Sign Overhangs Sidewalk: >12" Landscape Material: Yes Landscape Overhangs Sidewalk: >12" Other: <= 4"
Is there a Physical Constraint?	Building: Retaining Wall: Other:
Connects To Other Facility	
Is there a Roadway Cross Section?	Yes Sidewalk, Curb, Gutter: Yes Flush Shoulder: Yes
Is there a Sidewalk Separation?	Yes Separated From Road: Curb and Gutter: Utility Strip <2' Not Separated From Road : Curb and Gutter: Back of Curb
Is there Lighting in this section?	Yes Roadway High Level : Yes Pedestrian Low Level : Yes
Notes	Testing 456

30.4743525277778/-84.1825416111111

--

Should a marked crossing be added to this site (*currently one does not exist*)? \$CrossingNeeded

Is a marked crossing present? \$ MarkedCrossings

Information on Current Marked Crossing

Is there a Ramp Present?	Yes
Ramp Type	CR-A
Ramp Length	<72"
Ramp Width	<36"
Ramp Top Landing Width	<36"
Ramp Bottom Landing Width	<48"
Ramp Running Slope	<=8.3 %
Ramp Rise Height	1
What is the Ramp Counter Slope of the adjoining gutter/roadway?	<=5 %
Ramp Cross Slope	<=2 %
Slope of First Flared Side	<=10 %
Slope of Second Flared Side	<=10 %
Are the Truncated Domes complete and uniform in color and texture?	Yes
Are there 5 or more non-compliant Domes in any one square foot?	Yes
Are there 2 non-compliant Domes adjacent to each other?	Yes
Are Domes located more than 5 feet from the back of the curb or edge of pavement?	<=2" back from curb
Is the section of Domes at least 2 feet in length?	Yes
Are Domes located in the right position?	Yes
Is there a Horizontal Opening?	<=1/2"
Is there an Island/Median present?	Yes
Is there a Pedestrian Refuge?	60" deep by 60" wide
Is Pedestrian Refuge > 6'	Yes
Is there a Pedestrian Signal?	Yes
Is there a Push-Button?	Yes Raised: Yes Features: Audible Height: <=42"

	Level Clear Space: Yes Lanes to Cross: 1 Time to Cross: 30 seconds
Material	Concrete
Condition	Good
Notes	testing 789

1.0 General Information

1.0 GENERAL INFORMATION

A. GENERAL INFORMATION

1.1 System Overview

Collect and update sidewalk information in the field and log the location's defects.

- A software system based on the Windows 10 Platform. Also available for Android and IOS.
- GPS Precision Positioning provided by the Trimble RI GNSS Receiver
- System name or title: Sidewalk Field Inspection-TEST
- System category:
 - *General support system:* provides defect management for Leon County Public Works.
- Operational status:
 - **Partially Operational**
 - Software is currently in BETA
 - INFOR Sidewalk inventory is incomplete

1.2 Project References

References that were used in preparation of this document in order of importance to the end user.

[Trimble R1 GNSS and Windows Bluetooth Precision Positioning](#)
[Fujitsu Laptop Users Guide](#)
[Collector for ArcGIS](#)
[Survey123 for ArcGIS](#)

1.3 Authorized Use Permission

TLCGIS provides you, the user, with access to a variety of resources including documentation and product information (collectively the “Documentation”) and other services (collectively "Services").

1.4 Points of Contact

The points of organizational contact (POCs) that may be needed by the document user for informational and troubleshooting purposes.

Software—GIS Technical Staff

OIT:	Office of Information Technology
MIS:	Management Information Systems
GIS:	Geographic Information Systems
ESRI:	An international supplier of geographic information system software
SBAS:	Satellite-based Augmentation Systems

2.0 System Summary

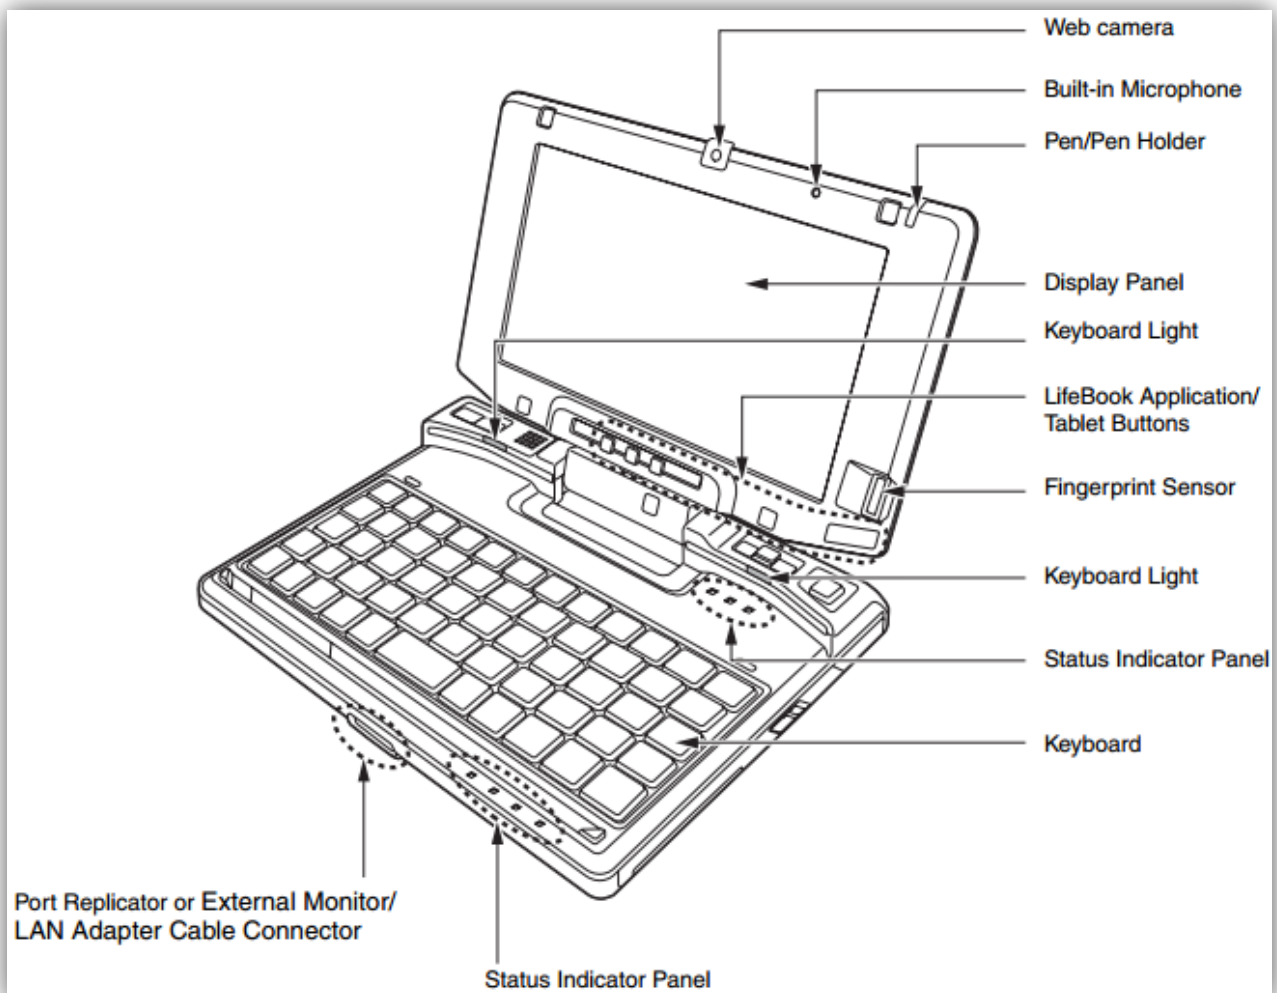

2.0 SYSTEM SUMMARY

B. SYSTEM SUMMARY

With the Sidewalk Field Inspection App it is now relatively easy to go out and capture the data needed using a Fujitsu tablet. With the help of the Trimble R1 GNSS Receiver and Collector defects can be quickly recorded and mapped. The new data and photographs are all automatically updated to ArcGIS online so it can be easily accessed by permitted users at any time. The progress of data collection by a field worker can be monitored with ease.

2.1 Hardware

Fujitsu Notebook: is an ultra-mobile convertible computer. It can be used either as a standard notebook using keyboard input, or in tablet configuration using touch input.

Trimble R1 GNSS Receiver: is a high-performance GNSS receiver with an integrated antenna and Bluetooth wireless technology. This device offers a convenient solution with precision accuracy.

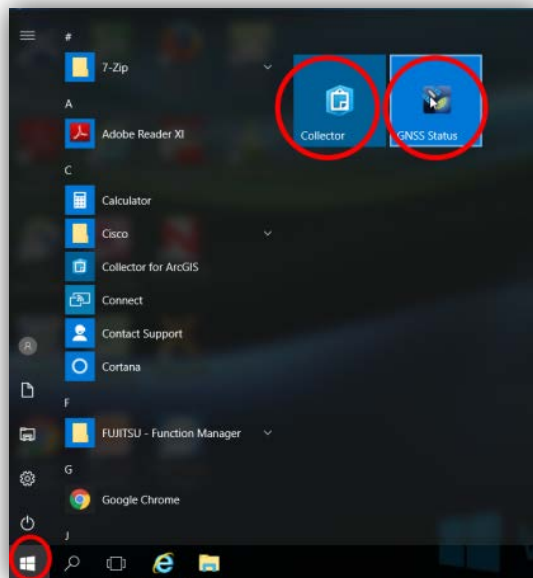

2.0 System Summary

2.2 System Configuration

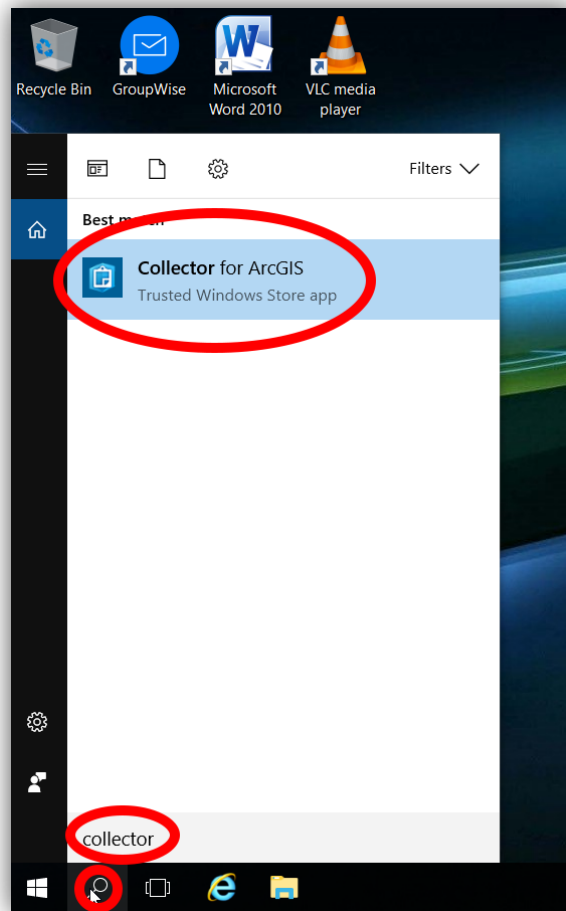

Windows 10 features a new user interface. The home screen, called the "Start screen", is made up of "Tiles". Tiles are links to applications, features, functions and individual items (such as contacts, web pages, applications or media items). Users can add, rearrange, or remove Tiles. Tiles are dynamic and update in real time.

For the sake of convenience we have configured the device to show the 2 applications needed in the Start Screen

If at any time GNSS Status or Collector cannot be found in the Start Screen. Type either of their names in the search and the app will become available.

2.0 System Summary

2.3 User Access Levels

Qualified users are members of the ArcGIS **Leon County Public Works Group**.

3.0 Getting Started

3.0 GETTING STARTED

C. GETTING STARTED – NOTEBOOK MODE

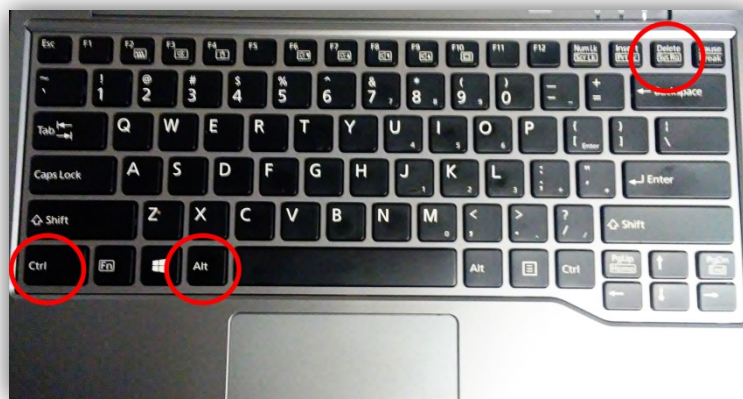

3.1 Powering On

The Power button is located on the right side of the monitor.

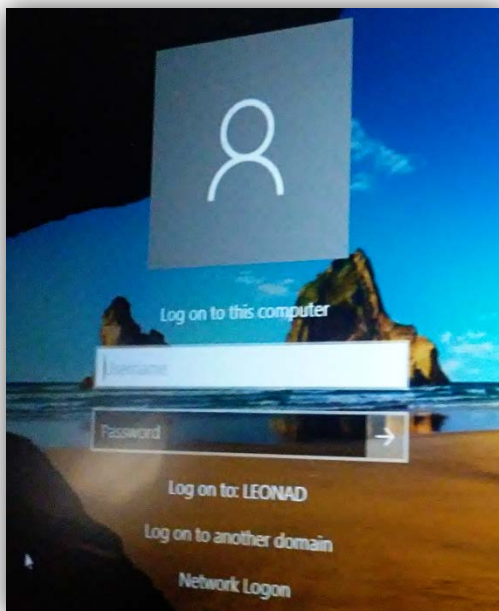

3.2 Logging On

When the Fujitsu notebook is powered up the user will immediately be taken to a locked screen.
Press: Control Alt Delete **simultaneously**

The Leon County Security Notice will appear. Please read the information and press OK to continue.
The opportunity is presented to log into the device with the credentials provided to you.

3.0 Getting Started

3.3 A Forgotten User ID and Password

If you have forgotten the user ID and password please contact the TSC.

3.4 Powering Up the Trimble R1 GNSS Receiver

Hold the power button for roughly 2 seconds

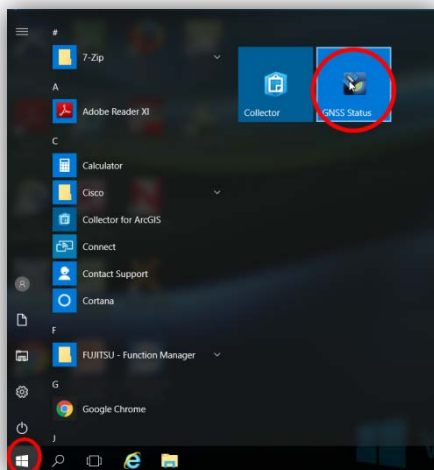

3.5 Pairing the Trimble R1 GNSS Receiver

Hold the power button for 5 seconds and let go when one blue light starts blinking

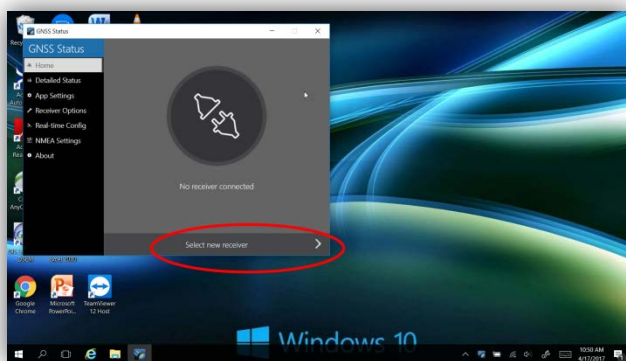

3.0 Getting Started

Go to the start menu and choose **GNSS Status**

The GNSS Home Screen is presented where the user will choose **Select New Receiver**

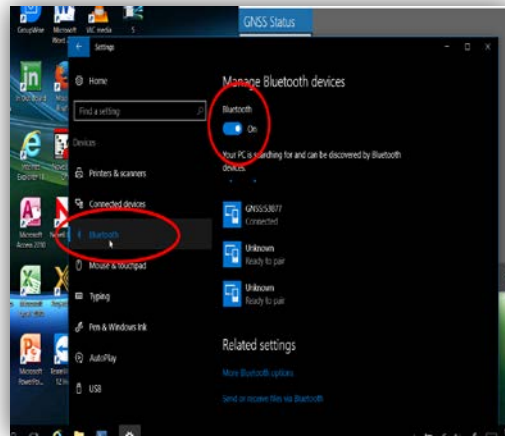

Choose your **GNSS Device**. *Please note that GNSS numbers will vary.*

3.0 Getting Started

Please Note

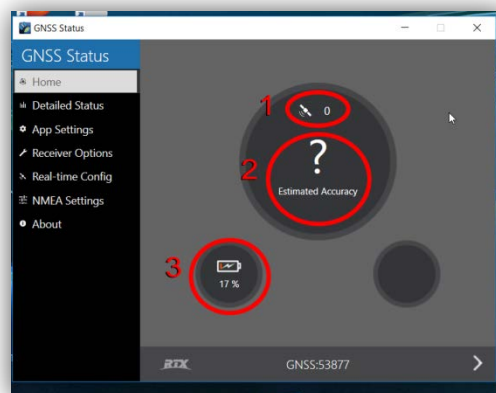

If you **do not** see your Trimble R1 GNSS receiver try the following:

1. Press the refresh button
2. Make sure Bluetooth is enabled on the Fujitsu Notebook
 - a. Go to the search button (next to start) and type Settings
 - b. Open Settings and choose Devices
 - c. Choose Bluetooth and make sure the Bluetooth option is On

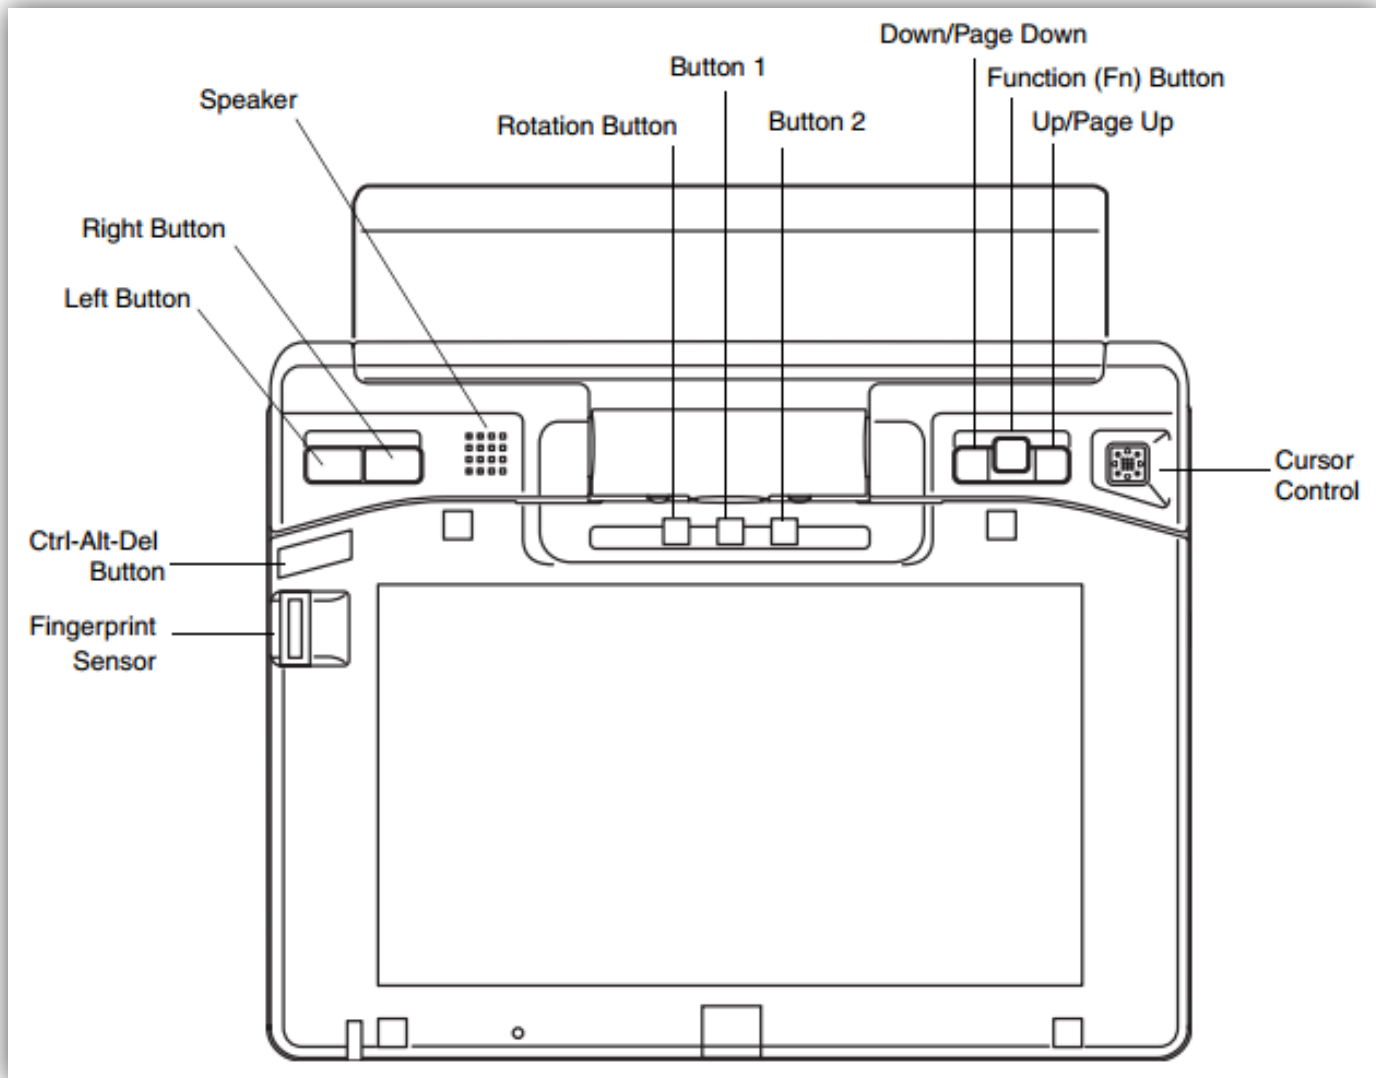

3. Make sure the blue button is flashing on the Trimble R1 GNSS Receiver. If it has stopped flashing blue try holding it down for 10 seconds

Once the device has been paired the following information will display:

1. The number of satellites
2. Accuracy in feet of what you are collecting
3. Battery life of your Trimble R1 GNSS receiver
4. SBAS information which shows precision accuracy

D. GETTING STARTED – TABLET MODE

3.1 Using the System as a Tablet

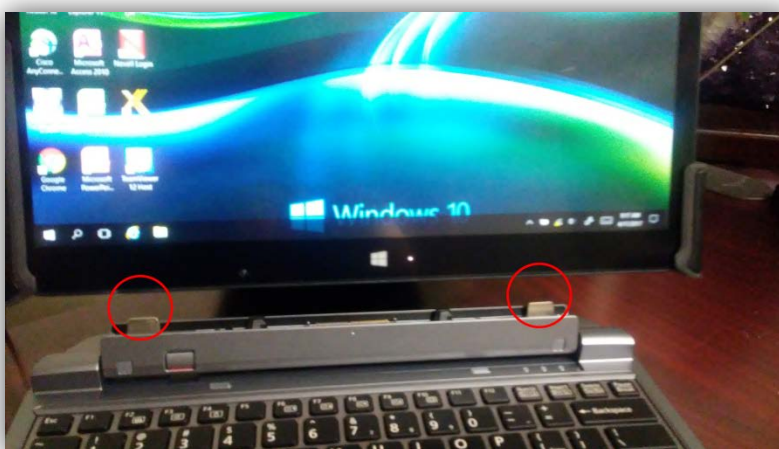

To use the system as a tablet, perform the following steps:

1. Lift the display until it is perpendicular to the keyboard.
2. When the display is perpendicular press the button to detach the monitor from the keyboard.

3.0 Getting Started

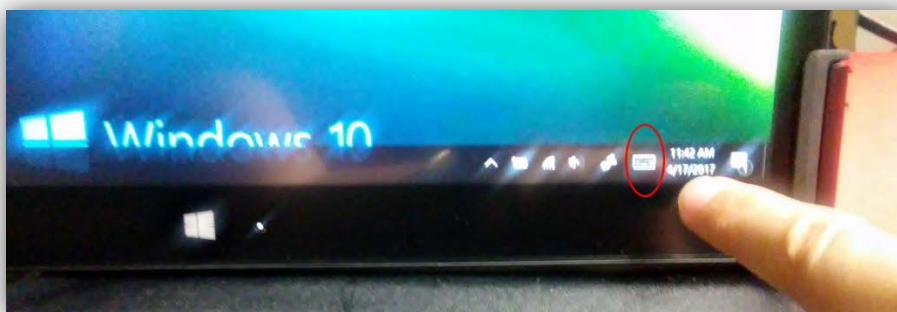

3. Holding the top edge of the monitor, pull it upward until it is detached.
4. To return the system to notebook mode, line up the metal tabs on the notebook with the corresponding opening on the monitor and gently press down.

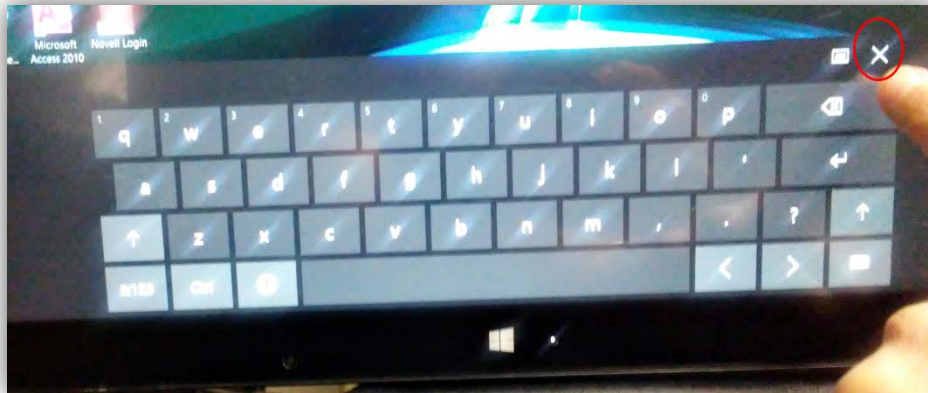

3.2 Logging On

When powering on in tablet mode bring up the virtual keyboard to log in. This is done by choosing the keyboard icon in the lower right side of the screen.

3.0 Getting Started

To collapse the keyboard press the X in the upper right portion of the keyboard

Please note
If you find yourself typing numbers instead of letters press the **Num Lk** button. This should release the Number Lock.

4.0 Collecting Sidewalk Information

**4.0 Collecting Sidewalk Information
The Software**

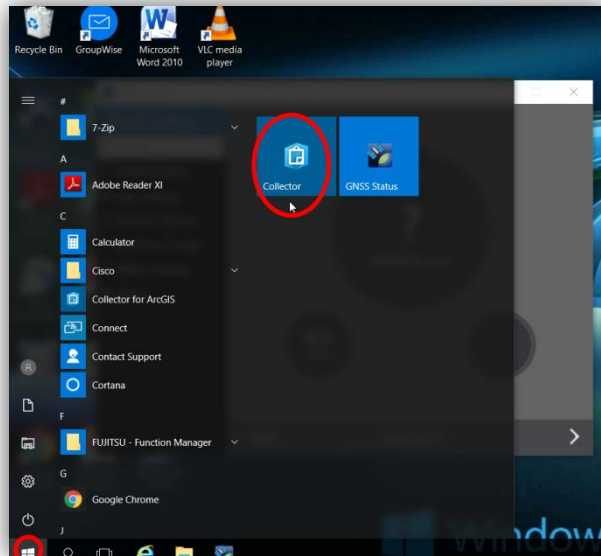

4.0 Collecting Sidewalk Information

E. THE SOFTWARE

4.1 Using Collector

Once the Trimble R1 GNSS device has been paired the collection and or editing of sign information can begin.

This is done by going to the start menu and choosing the **Collector app**.

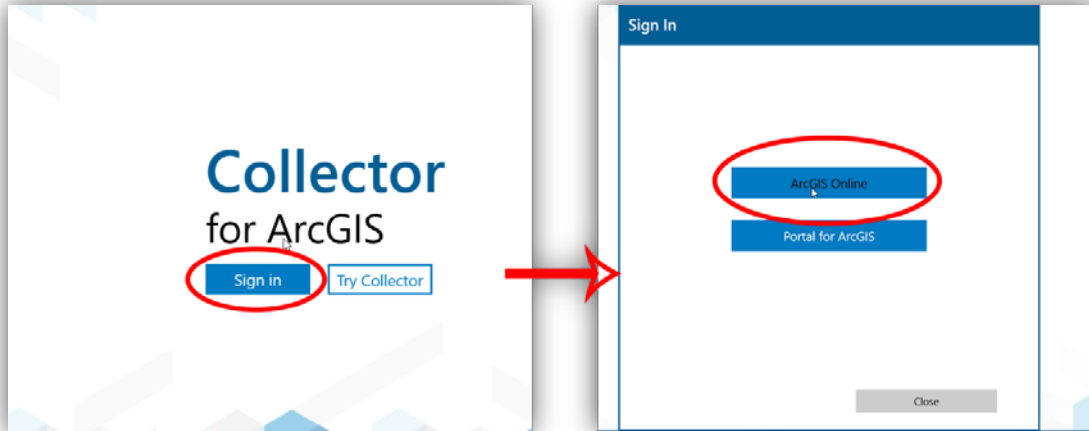

The user will then be taken to a log in screen. Log in with the AGOL provided to you. If you have forgotten your AGOL password please contact TLCGIS at 606.5504

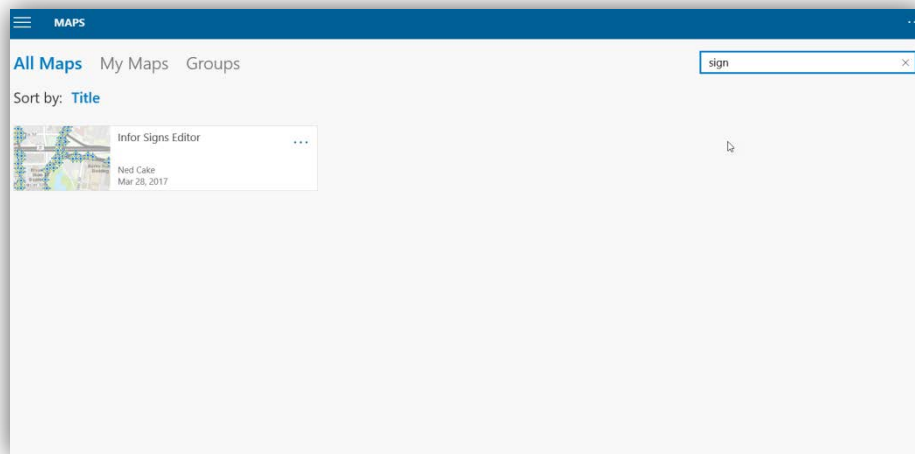

Please Note

Unless you specifically sign out the credentials are embedded. We strongly advise that you stay logged into the application.

4.0 Collecting Sidewalk Information

Choose the Sidewalk Field Inspection map

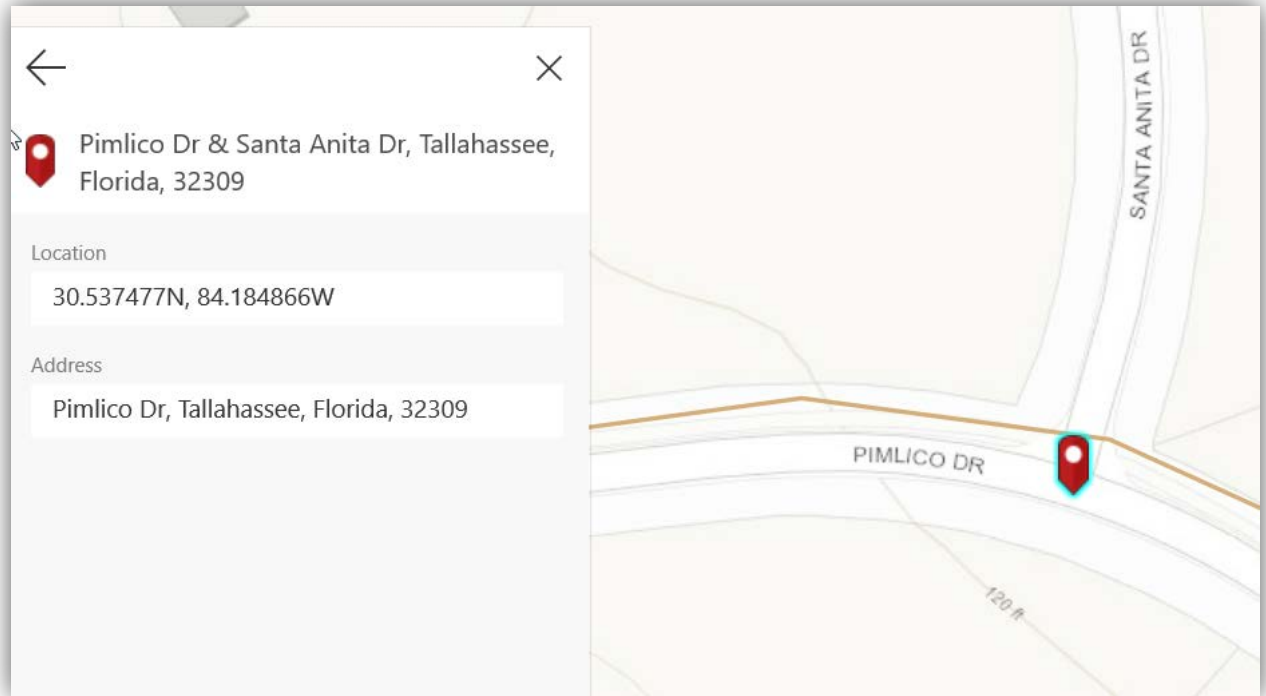

You will have 2 choices for navigation.

1. The Locate me icon: when pressed you can use this to drive to your location.
2. Search: you will have the ability to input an address or a cross street.

4.0 Collecting Sidewalk Information

4.1.1 Ribbons

The Default Ribbon

1. **Navigation:** The Navigation option gives the user the ability to change the basemap. The device has been configured for each user.
 - a. **Maps:** Takes the user to the Map Gallery
 - b. **Favorites:** Display map favorites
 - c. **Recents:** Display recent maps
 - d. **On Device:** Display maps on the device

We strongly advise against changing the maps in this area.

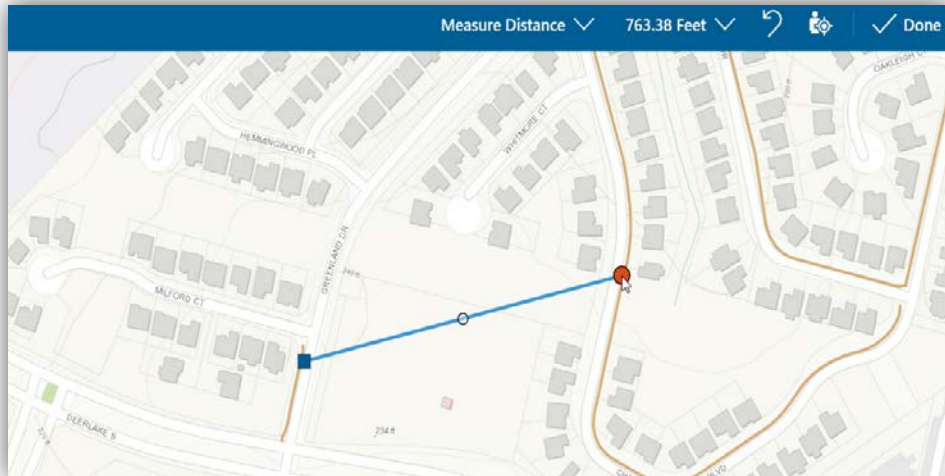

2. **Location:** The Location option will immediately zoom to the user's location with a buffer.
3. **Search:** The Search option will allow the user to search for a specific location.
4. **Add New:** The Add option allows the user to add a new feature to the map. *Because we are launching into another application from the map we will NOT be using this feature.*
5. **Additional Navigation:** The additional navigation option gives the user access to the following tools
 - a. **Map Contents:** Display the layers in the map and allows the user to turn features on and off. While this changes which features are visible and display on the map, it does not change the data in the map.

We strongly advise against changing the features in this area.

- b. **Bookmarks:** Will go to previously defined areas of interest.

4.0 Collecting Sidewalk Information

- c. **Basemaps:** Allow the user to change the applications basemap. **We strongly advise against changing the maps in this area.**
- d. **Measure:** The measure tool allows the user to measure distances between features on the map. In the following example we chose 6 signs by clicking **Measure**, then double clicking on 6 consecutive signs showing there is 553.43 feet on this signage route. Click **Done** to close the measure window.

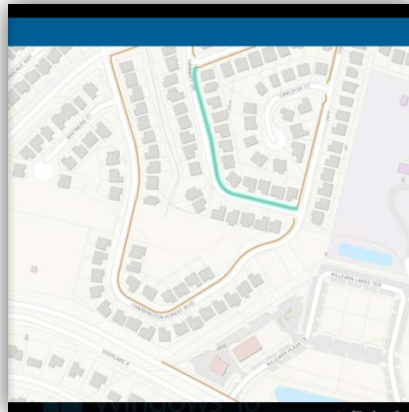

4.2 Workflow

When the Trimble R1 GNSS device is paired, Collector is open and the map appears the end user is ready to input a street segment defect.

4.2.1 Collecting a Defect

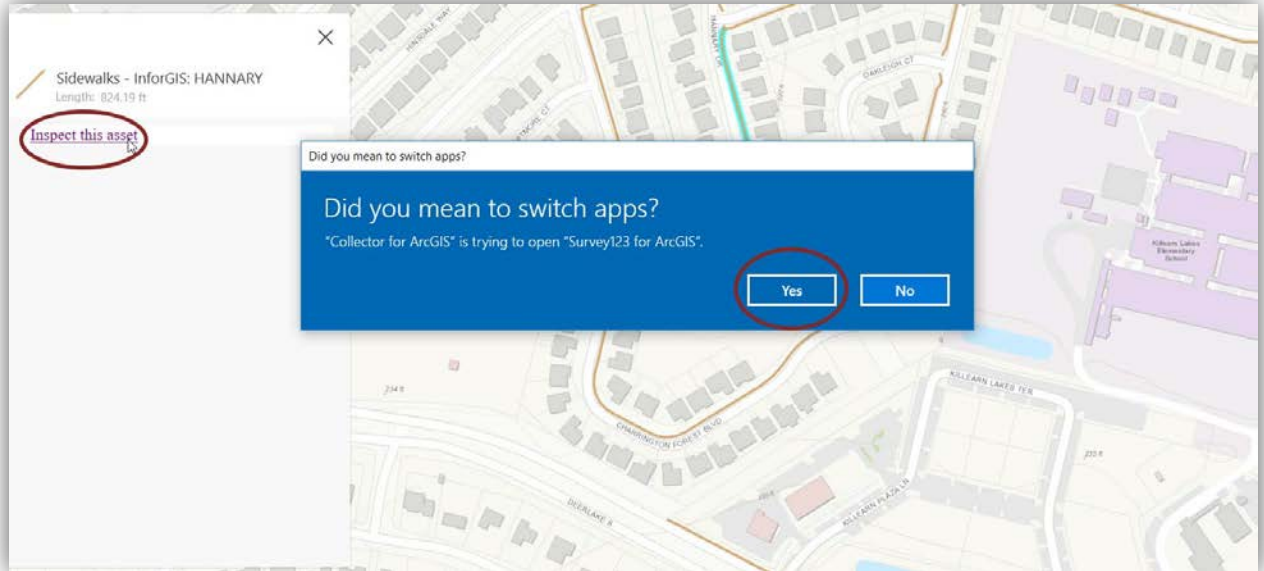

4.2.1.1 Launching the Survey from Collector

1. To collect a new defect click on the line segment. If successfully selected it will have an aqua halo around the line segment.

4.0 Collecting Sidewalk Information

2. Verify that you have captured the correct line segment and choose **Inspect this asset**
An alert box will appear asking “Do you mean to switch apps?” Choose Yes

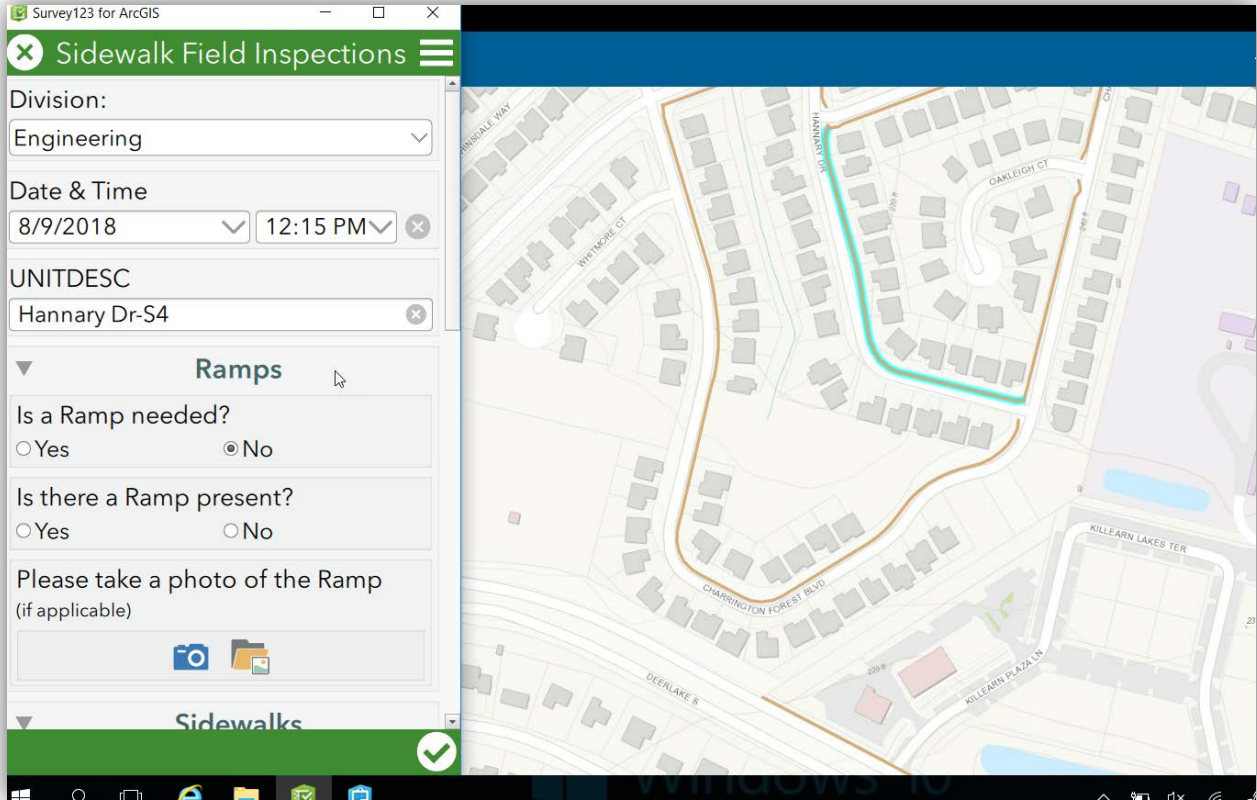

3. This will launch the Sidewalk Field Inspections Application.
4. Division, Date & Time and UNITDESC will be pre-populated. Your username will be pre-populated within the system.

Please Note

*You will need to be as close to the defect as possible for an accurate reading. If the distance is **RED** this means your accuracy cannot be verified. Proceed towards the defect until the ft have a **GREEN** background. If further assistance is needed please contact TLCCGIS.*

4.0 Collecting Sidewalk Information

4.2.1.2 Within Survey 123

The Survey is split into 3 Sections. There is not a constraint on the sections so one or up to all 3 can be filled out and submitted at once.

Each section has 2 choices. If a Ramp, Sidewalk or Crossing is needed in the *Is a X needed?* Choose, Yes and continue.

4.0 Collecting Sidewalk Information

The screenshot shows a mobile application window titled "Survey123 for ArcGIS" with a sub-header "Sidewalk Field Inspections". At the top is a text input field labeled "UNITDESC". Below this are three expandable sections, each with a downward arrow icon and a title: "Ramps", "Sidewalks", and "Crossings". Each section contains two questions with radio button options for "Yes" and "No". In the "Ramps" section, "No" is selected for "Is a Ramp needed?" and "Yes" is selected for "Is there a Ramp present?". In the "Sidewalks" section, "No" is selected for "Is a Sidewalk needed?" and "Yes" is selected for "Is there a Sidewalk present?". In the "Crossings" section, "No" is selected for "Is a Marked Crossing needed?" and "Yes" is selected for "Is there a Marked Crossing?". At the bottom right of the form is a green button with a white checkmark icon, labeled "SUBMIT".

RAMPS

SIDEWALKS

CROSSINGS

SUBMIT

If a section is present choose yes and the section will expand revealing a list of questions. **If there are no defects** for the section still Choose Yes to record that there is, in this example, a Ramp present. Take a photo of the Ramp and then choose the Ramp type. For your convenience a link of Ramp types have been provided in the application to review in the field. Fill out the relevant questions.

4.0 Collecting Sidewalk Information

The screenshot shows a mobile application window titled "Survey123 for ArcGIS" with a sub-header "Sidewalk Field Inspections". The main section is titled "Ramps" and contains the following fields:

- Is a Ramp needed?**
 Yes No
- Is there a Ramp present?**
 Yes No
- Please take a photo of the Ramp (if applicable)**
A folder icon is shown below the text.
- Ramp Type**
 CR-A CR-B
 CR-C CR-D
 CR-E CR-F
 CR-G CR-H
 CR-K CR-L
- [View DOT Standard Plans Index 522-002](#)
- Ramp Length**
 <72" >=72<88"
 >=88"
- Ramp Width**
 <36" >=36<48"
 >=48"
- Ramp Top Landing Width**
 <36" >=36<48"

A green bar at the bottom of the form contains a white checkmark icon, which is circled in red.

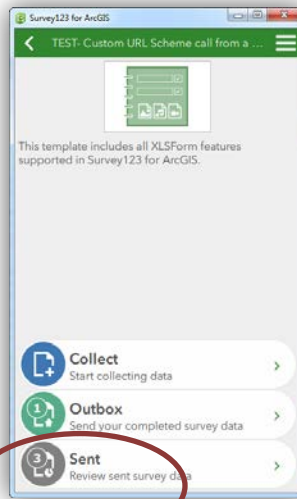

Upon completion either continue to another section or press Submit (the green check box) to complete.

4.0 Collecting Sidewalk Information

4.2.2 Reviewing Submissions

4.2.2.1 Editing

If an edit needs to be made this action needs to be done via the Survey 123 App. Launch Survey 123 and choose Sent.

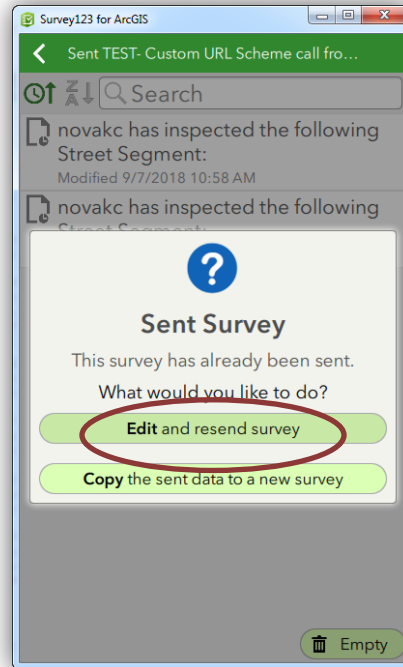

You will be presented with a list of your completed surveys. Choose the desired survey.

Please Note

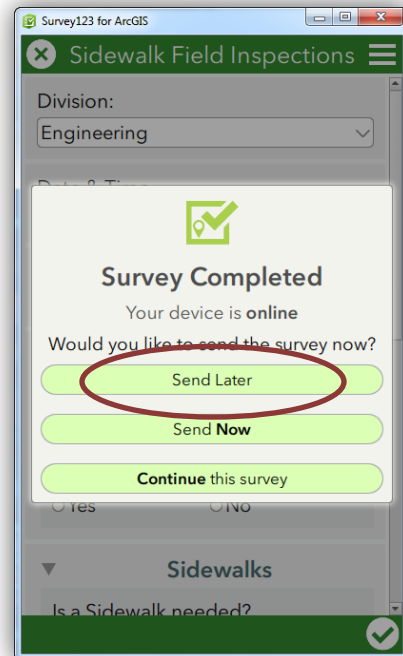

*Because we are launching off of a sidewalk segment I would **discourage** using the Copy the sent data to a new survey option.*

4.0 Collecting Sidewalk Information

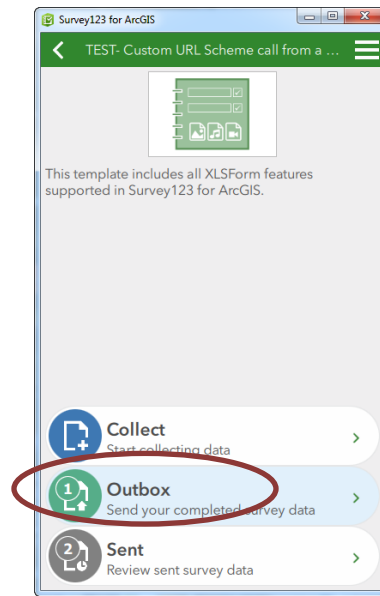

4.2.3 Offline Submissions

The application is dependent upon an internet connection to send the data. Due to questionable cell service in the outer areas of the county you have the option to **Send Later**

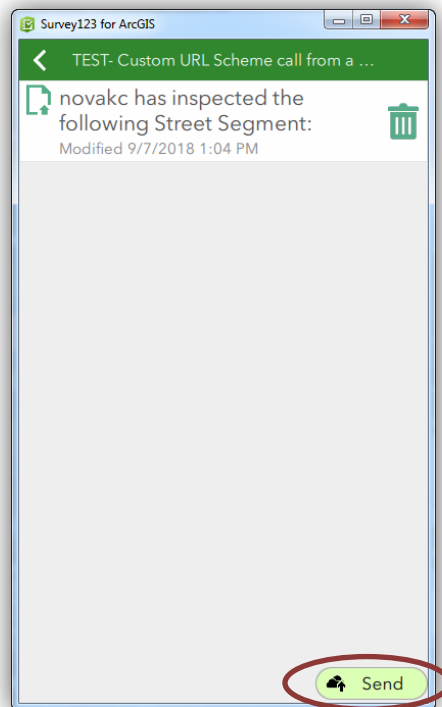

The application will store multiple submissions. When cell service is regained open the Outbox

4.0 Collecting Sidewalk Information

And choose Send to complete.

5.0 Reporting

5.0 Reporting

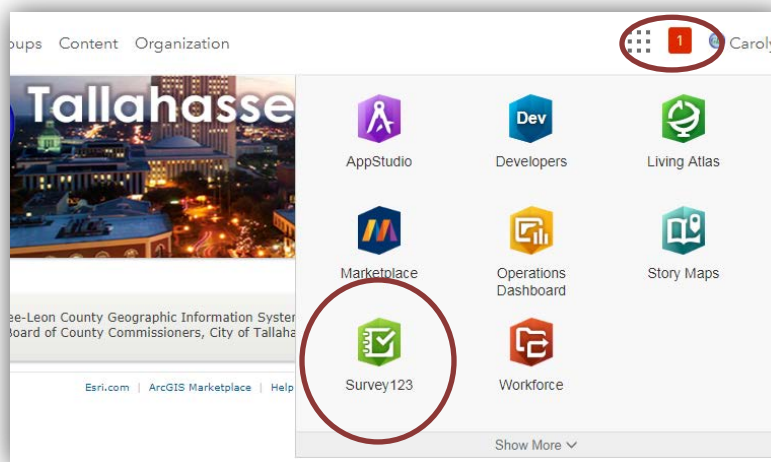

F. REPORTING

Currently there are 2 options for running reports. Choose the appropriate path depending on your need and credentials.

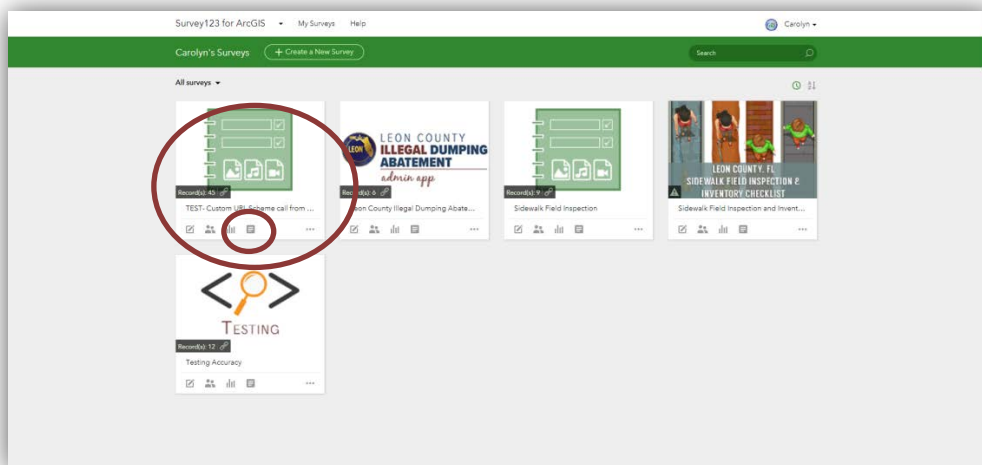

5.1 Log into ArcGIS Online

Log in with your AGOL credentials. Reporting is dependent upon your level of access.

Choose the grid icon and then Survey 123

Because we are still in **the Beta** version of the application select TEST-Custom URL Scheme call from... and choose the data icon

5.0 Reporting

5.1.1 Individual Custom Reports

Once the data section is launched select the submissions for the day you would like to report on and choose the Report (Beta) tab. A custom report template has been created for your use. Select template 3.2 and generate.

The screenshot shows the Survey123 for ArcGIS interface. At the top, there's a navigation bar with 'Report (Beta)' selected. Below the map, a table displays inspection data. The 'Report' panel on the right is configured with template 3.2, item title 'September 7th Inspections', and folder 'novakc's root folder'. A 'Generate' button is visible at the bottom of the panel.

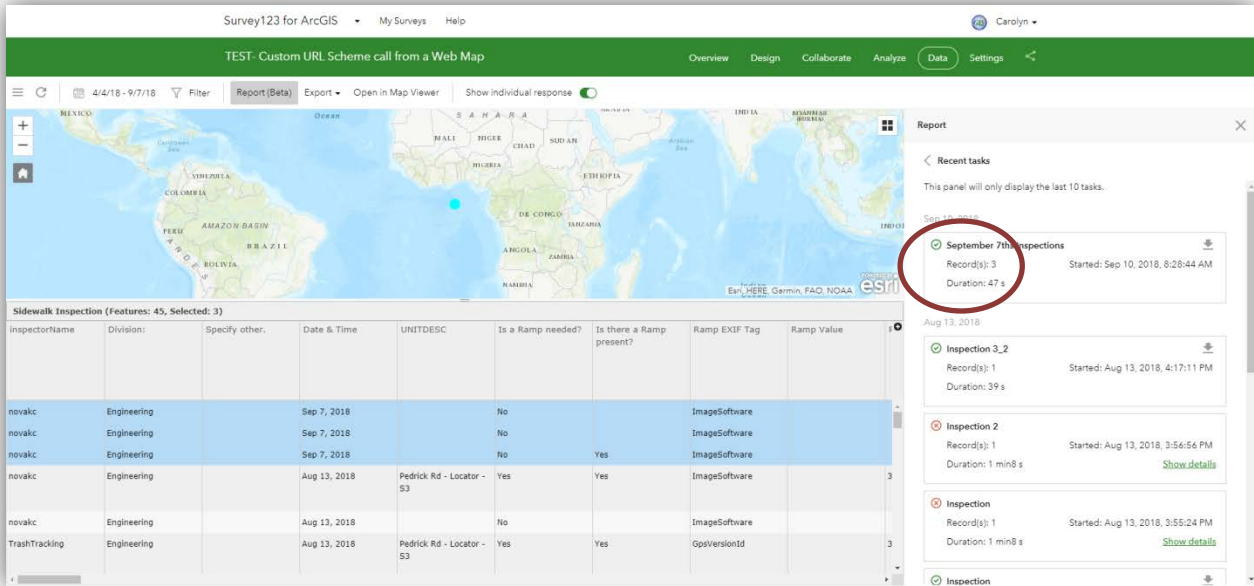

InspectorName	Division	Specify other	Date & Time	UNITDESC	Is a Ramp needed?	Is there a Ramp present?	Ramp EXIF Tag	Ramp Value
novakc	Engineering		Sep 7, 2018		No		ImageSoftware	
novakc	Engineering		Sep 7, 2018		No		ImageSoftware	
novakc	Engineering		Sep 7, 2018		No	Yes	ImageSoftware	
novakc	Engineering		Aug 13, 2018	Pedrick Rd - Locator - 53	Yes	Yes	ImageSoftware	3
novakc	Engineering		Aug 13, 2018		No		ImageSoftware	
TrashTracking	Engineering		Aug 13, 2018	Pedrick Rd - Locator - 53	Yes	Yes	GpsVersionId	3

After about a minute of processing time your reports will become available. If you need to review the reports or check on processing time select **Recent Tasks**

This is a close-up of the 'Report' configuration panel. It shows the 'Choose records to include' section with 'Selected records only (3)' selected. Below that, 'Select a template' is set to '3.2'. The 'Save result to your account' toggle is turned on. The 'Item title' is 'September 7th Inspections' and the 'Folder' is 'novakc's root folder'. A 'Generate' button is at the bottom. At the very bottom, there is a 'Recent tasks' link with a right-pointing arrow, which is circled in red.

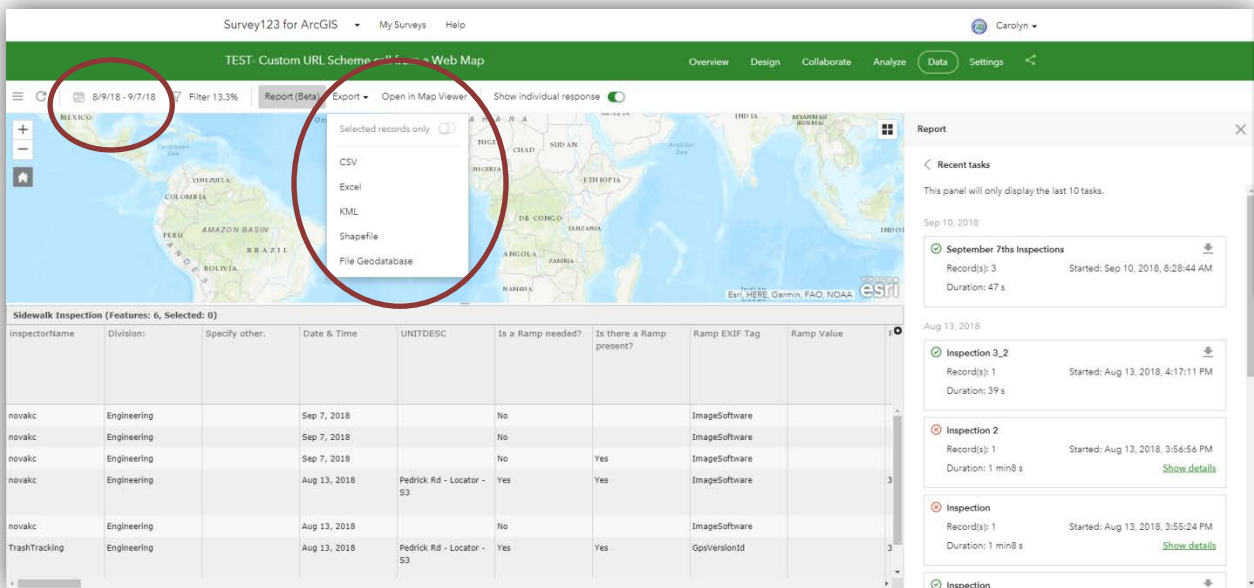

This will give you the opportunity to download the information again.

5.0 Reporting

5.1.2 All Data

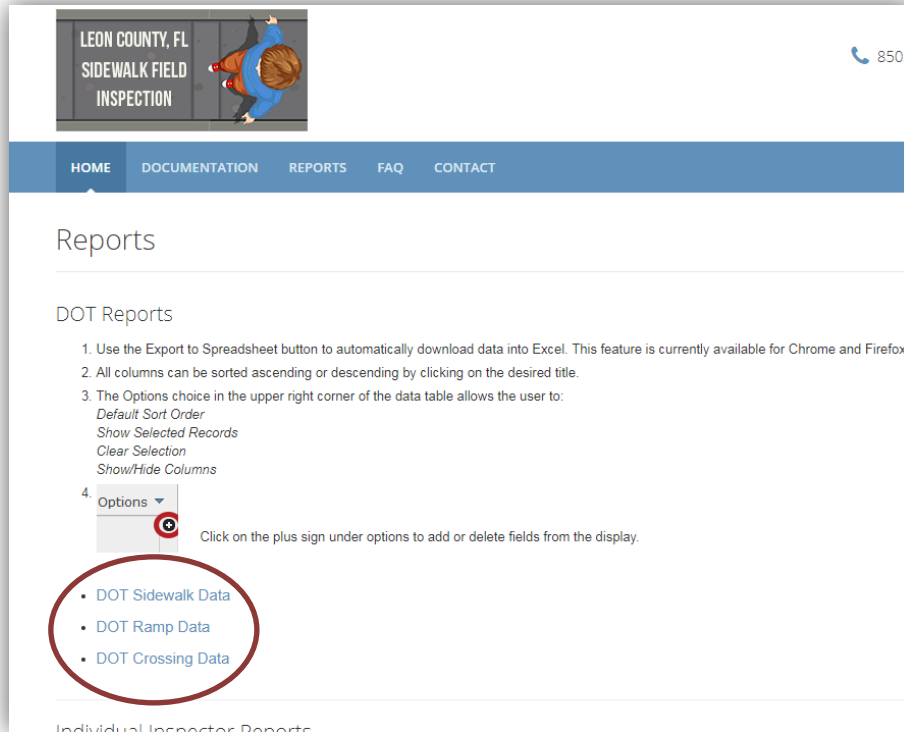

The user has the ability to export all data for a given date range by choosing the date range and Exporting the data to either a CSV, Spreadsheet, KML, Shapefile or File Geodatabase.

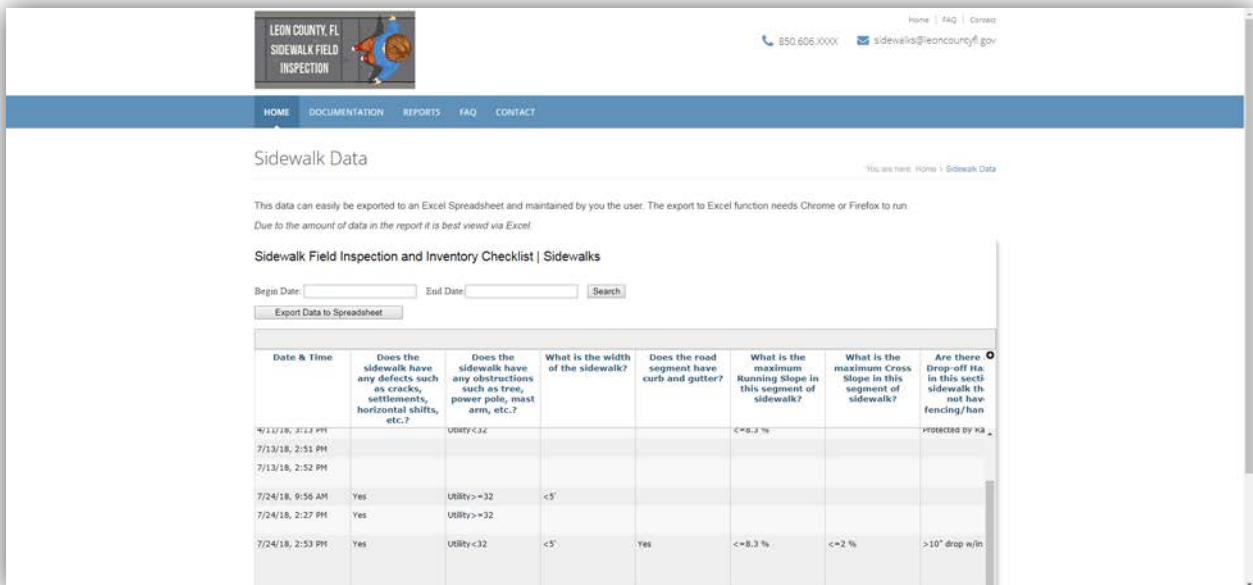

5.2 Visit the Sidewalk Website

If you are unable to access the AGOL Survey 123 Dashboard or for information on the fly visit the Sidewalks website: <http://tlcdev.leoncountyfl.gov/Carolyn/Sidewalks/reports.asp>

5.0 Reporting

The information has been separated into the Survey's Sections: Sidewalk, Ramp and Crossing Data. Choose the appropriate section that you would like to review to be presented with the data.

You have the ability to search via a date range and export the content to an excel spreadsheet.

Sidewalk Repair Report
