Experience:

Current: Owner – Operator of Hats and Hoops Embroidery Works, LLC
On April 18, 2007, my wife Gail and I started an embroidery business as a Florida Corporation. This is a part-time business and only requires a few hours a week of my time. We embroider shirts, hats, towels, and a whole range of personal items.

Jackson Hewitt / Capital City Tax Venture: December 2008 – April 2009, As a Professional Tax Preparer registered with the United States Department of Treasury - Internal Revenue Service, I have passed all certifications for Professional Standards, Fraud and Ethics and Tax Code requirements. In my first year of employment, and with my background, I was asked to manage the Jackson Hewitt Tax Service office in Crawfordville, Florida. I supervised seven full and part-time employees for the tax season beginning in January and running through April 2009.

Vision Database Systems: August 9 – 27, 2006, I participated as a team member at an ID carding at Eastern Illinois University in Charleston, IL. Our three member team worked with EIU card center personnel and ran a very successful carding event. We carded close to 10,000 faculty, staff and students in 10 days of carding.

Retired – June 30, 2006 from The Florida State University.

Florida State University
FSUCard Center, 2000 – June 2006
Interim Director – November 2005 – March 2006
Responsible for all software and hardware activities involving card production systems and the issuance of FSU ID cards. This includes mainframe applications as well as our PC based ID Card production software. In addition to the aforementioned applications, I also designed, developed and implemented some home grown applications such as the

- "Status Verification Process" where we use PDA's to verify student status,
- "Remagification Application" where we remagnatize the magstripe instead of having to reproduce a new card,
- "Seminole Circuit", our long distance calling program

to compliment and help the FSUCard Center program operate efficiently.
I worked with banking and university officials to identify and investigate fraudulent use of ID cards. In addition, I worked closely with our banking partners in the creation and issuance of the Florida State University ID cards.

In June, 1996, our team implemented the "Chip" based ID card at FSU. This maintained the FSUCard Center's position as one of the leading institutions across the country in the card services industry.

Card Application Technology Center (CATC): 1994 - 2000
As a founding member of the Card Application Technology Center, I worked in the ID card applications development area where I was involved in all aspects of ID card applications from design and development to testing and implementation. Since 1994, I have assisted or coordinated the ID card integration/implementation strategies for more than **125** institutions across the country. During this time, as the Director of Technical Services (working title), I conducted research and development in numerous areas affecting card systems. I worked with various vendors in fine tuning applications such as the ISO/Library number generator, the library reader application that converts the 16 digit ISO number into a standard 14 digit patron ID number for the library system, and the ID-Swipe application for our long distance calling partners. These are only a few examples, but our work at the CATC resulted in FSU being the catalyst in the ID card industry. Certainly, this is not all inclusive, but some of the areas that I have experience include ID Card production, Banking, Telephony, Library and Security systems.
In addition, I was the lead consultant for carding applications. I was responsible for conducting pre-carding meetings with institutions, coordinating the carding event as well as the data flow back to our event setup group. I would attend the carding event during setup and startup to ensure that all aspects of the event functioned as designed. In the event that a problem developed, I was responsible for finding and coordinating a quick solution. As a result of my work with the Card Application Technology Center, I was awarded the 2003 National Association of Campus Card Users – Persona Professional Development Award,

Departmental Consulting Services: 1990 - 1994
A product of reorganization, the Departmental Consulting Services group included a small group of systems personnel that knew the history as well as the operations of various major applications in use at the University. A change in direction was made for this group, and we started working with various vendors across the country conducting initial investigations for applications that would eventually be used for ID card production and security systems. This work led to the formation of the Card Application Technology Center where we continued our research and development in Security Systems (Diebold), ID Card Production (Datacard and Vision Database Systems), Library systems as well as the banking industry.

Administrative Information Systems: 1977 - 1989
Led a group of four teams (25 employees' total) in the design, development, implementation and maintenance of computer applications involving the following four areas:

- Administrative Academic Systems (Registrar, Admissions, Orientation, etc.),
- Cashier Systems
- Financial Aid Systems and
- Health Center & Housing Applications.

During my tenure in this group, my major responsibility included the design, development and maintenance of on-line systems that are still in use today. They include the Student Data Base, The Admissions applications, The Enrollment System, the Crossover File, and others. In 1987, I wrote one of three major modules of the Telephone Registration System. This was the first major initiative that moved the University from the paper environment into the technology arena.

During this timeframe, I also researched and developed HLLAPI's (High Level Language Application Programming Interface), which was the frontrunner to what we now know as FTP (File Transfer Protocol). This allowed our users to upload or download data files for use on their individual workstations.

Comptroller's Office & Department of General Services: 1972 - 1977
I started my government service with the Comptroller's Office, State of Florida in 1972. Major systems that I wrote or rewrote was the state Reconciliation System and the Expense System. In addition, I wrote several statistical applications for the State Library before I transferred to The Florida State University.

Education:
Florida State University, 1980, Bachelor of Science, Major: Business Management.
North Florida Community College, 1969, Associate of Arts Degree, graduated Phi Theta Kappa Honorary Society.
Taylor County High School, 1967, Diploma

Awards and Certifications:
* Certified Tax Preparer with the U.S. Department of Treasure – Internal Revenue Service.
* Recipient of the 2003 NACCU – Persona Professional Development Award, given by the National Association of Campus Card Users. The professional development award is given annually to an individual who actively participates in the research and development of card related technologies and has contributed not only to a particular campus, but also to the card services industry as a whole.
NACCU works to provide learning and networking opportunities for campus ID card and card industry professionals.

* MCP – Microsoft Certified Professional
* Licensed Real Estate Professional (State of Florida)
