

Safety Tips for Leon County Hazardous Waste Center

Summer 2014: Controlling Leaks

Controlling leaks from items brought to the Hazardous Waste Center will prevent exposure to harmful materials and avoid damage to your car. Household items like large zipper bags (above) or plastic buckets (below) are great for keeping leaks under control. While wearing rubber gloves, simply place the problem container in the bag or bucket and close. Remember to label so that there are no surprises when you arrive at the center.
