Mr. Caleen,

I will make sure that this email is attached to the agenda item for the Board's consideration of the ordinance on May 12.

>>> rip caleen <ripcaleen@yahoo.com> 4/22/2009 1:04 AM >>>  
Dear Ms. Youmans,

Bob Ippolito has confirmed that these five alternative numbers/changes are the optional choices he, Brad Trotman and I would like the Commission to have before it at the first and second public hearings on proposed changes to the billboard ordinance.

There are other improvements that we may mention, such a limit on the number of tri-visions and space limits applied by radius; Mr. Biblo and staff are well aware of them. But we are trying to limit our requested changes to the staff proposal and avoid overloading the Commission's plate with two many issues.

Thank you for noting these alternatives on the agenda so that they will be available to the Commission without having to renote and schedule further hearings.

Sincerely,

R. L. Caleen

Please review and confirm that these are the five changes we listed at the meeting last week and are asking the Commission to adopt in lieu of the staff's related proposals:

1. Pg. 22 (1): Adopt city standards of 2000 ft between standard billboards (instead of 1800 or 1500 ft) and 4000 ft between variable message and digital billboards (instead of 2000 and 3,500 ft).
2. Pg. 24 (a): Adopt city tri-vision swap ratio: removal of three existing billboards for each new multivision billboard (instead of one multivision or two standard billboards and double credit for removal of non-conforming billboard as to location).
3. Pg.26 (b): Adopt city variable message (digital) swap ratio: removal of five existing billboards for each new digital billboard (instead of four existing billboards and double credits for non-conforming billboards as to location and for multi-visions, and double-double i.e. four credits for non-conforming billboard as to gateway road overlay restrictions).
4. Pg. 21 (d),pg. 25 (b) and current Sec. 10-1833 (d) 5.(a): Adopt minimum setback of 1000 ft from residentially zoned property for all billboards-- standards, multivisions and digitals (instead of proposed 150 ft for standards and 200 ft for multivisions and existing 300 ft for digitals).
5. Pg. 14 (c): Delete entire provision which would allow, subject to conditions, non- conforming billboards as to location to be relocated to another portion of the parcel yet remain non-conforming as to location.

I will forward these on to Ms. Youmans, as she asked, as soon as you confirm that they are correct.
