1. Question: What accommodations will you provide your employees for restroom facilities, break/lunch area, water, ice, locker space, etc?
Answer:

2. Question: Once given a notice to proceed, when could you start?
Answer:

3. Question: What is your preferred billing cycle?
Answer:

4. Question: What length of contract term would best suite your firm?
Answer:

5. Question: Do you currently have pre-event contracts in place to grind storm debris for other jurisdictions? How many? Where?
Answer:

6. Question: Would your firm be amenable to having videos or photographs made of your operations in Leon County?
Answer:

7. Since development of this ITN, Leon County has learned of a possible opportunity for grant funding of a composting project. The compost would be used on site for a biofilter to reduce greenhouse gas emissions from the landfill. Hence, there is the potential that all of the incoming yard debris could be utilized for this project, at least over the next three years. The project calls for a contractor to debag the bagged yard debris and grind both the clean and debagged material into mulch. A trommel screen
--

and windrow turner would be purchased with the grant funds and be used to process the mulch into compost. If the County were to be awarded the grant:
a. Question: Would your firm be interested in debagging, grinding and possibly windrowing the ground yard debris on the County's site?
Answer:
b. Question: Do you have experience in producing compost from vegetative debris?
Answer:
c. Question: Would you be open to discuss possibly conducting the composting operation?
Answer:
d. Question: If the County were to produce more compost than needed for the biofilter, do you have experience in marketing compost? Would that be bagged or bulk? Would your firm be interested in that aspect of the County's project?
Answer:

Question to CRR only, since it was not specified in the ITN response: What do you intend to do with the material?

Answer:
