RE: Weir Removal 2 - Joint Project Agreement between Leon County and the ORSWCD for Funding, Design, Permitting, and Construction of Improvements to Munson Slough in Leon County

Dear Felton:

We have discovered that the second weir is located in the City. Because of this: (1) we developed an access agreement that was signed by the mayor; and (2) we have to go through the City's permitting processes. This is delaying the project's progress. We have signed an agreement that indicates that we are eligible for Ordinance 09-O-13, which establishes a temporary local economic emergency fast tracking program for the City. I believe that we will get started on the project shortly; however, I am not certain that we can complete the project by June 7, 2010, when our joint agreement with the County runs out.

Just in case I would like to request a 6 month extension to the agreement.

Cordially,

Scott Matteo, P.E., Chairman
Ochlockonee River Soil and Water Conservation District
