As you know, the City Commission has appointed Commissioner Mustian to work with the County Commission as we craft a process to review our options for the extension of the infrastructure sales tax or Blueprint 2020.

This is an important issue that I was pleased to bring before the Commission at our annual retreat this past December and I am grateful that our Commission has lead the effort to begin this dialogue. I have researched our existing program and have been focused on the extension of Blueprint 2000 for several years because I believe we must work with all stakeholders – the City of Tallahassee and our citizens – to review what has and has not worked in the past, to assess which current and future needs should be funded, and to decide how best to engage our partners so that this process is efficient, effective and inclusive.

I would be honored to represent the County Commission as we work with the City on this important and timely initiative. I believe my dedication to this issue and my knowledge of our current program and future needs will serve our County well and that I can successfully work with Commissioner Mustian to craft a process that will benefit our entire community. I appreciate your consideration and simply wanted to express my desire to further my work to address the needs of our County, no response is necessary.

Thank you,
Kristin
