

**RESOLUTION NO. R14-\_\_\_\_\_**

**A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS  
OF LEON COUNTY, FLORIDA, ADOPTING THE FIRE RESCUE  
SERVICES NON-AD VALOREM ASSESSMENT ROLL; PROVIDING  
FOR CERTIFICATION OF THE ROLL TO THE TAX COLLECTOR;  
AND PROVIDING FOR AN EFFECTIVE DATE.**

**RECITALS**

**WHEREAS**, on February 26, 2009, Leon County and the City of Tallahassee entered into an Interlocal Agreement for the provision of fire suppression, fire prevention and emergency medical services county-wide commencing October 1, 2009; and

**WHEREAS**, the Interlocal Agreement by and between Leon County and the City of Tallahassee provides for the funding and payment of *Fire Rescue Services* by means of the levy and collection of special assessments upon benefited property; and

**WHEREAS**, on March 19, 2009, the Board of County Commissioners enacted an ordinance amending Chapter 7, Leon County Code of Laws, relating to the provision and funding of *Fire Rescue Services*; and

**WHEREAS**, on October 29, 2013, the Board of County Commissioners adopted a *Fire Rescue Assessment Rate Resolution* levying and imposing upon each improved parcel of nongovernmental property located within the unincorporated area of the County an assessment in an amount found to be reasonably related to the cost of providing *Fire Rescue Services* to such property and thereby providing an equitably corresponding special benefit to such property; and

**WHEREAS**, pursuant to Section 197.3632, Florida Statutes, the Board of County Commissioners has reviewed the fire rescue services non-ad valorem assessment roll for conformity with the *Fire Rescue Assessment Rate Resolution*; and

**WHEREAS**, the Board wishes to approve and adopt the fire rescue services non-ad valorem assessment roll and to certify the roll for collection to the Tax Collector; and

**WHEREAS**, Leon County has provided notice of a public hearing at least twenty days prior to same by first class United States mail and by publication in the *Tallahassee Democrat* advising that a public hearing would take place;

**NOW, THEREFORE, BE IT RESOLVED** by the Board of County Commissioners of Leon County, Florida, that:

**Section 1. Recitals.** The Recitals to this Resolution are incorporated herein and made a part hereof as if fully set forth below.

**Section 2. Definitions.** For purposes of this Resolution, the definitions contained in section 7-39, Leon County Code of Laws, are incorporated herein by reference.

**Section 3.** Pursuant to Section 197.3632, Florida Statutes, Leon County hereby approves and adopts the fire rescue services non-ad valorem assessment roll, which is attached hereto as Exhibit 2 and incorporated herein as if fully set forth below.

**Section 4.** The unit of measurement for the fire rescue services non-ad valorem assessment is as set forth in the *Fire Rescue Assessment Rate Resolution*, which is attached hereto as Exhibit 1, and incorporated herein as if fully set forth below. The amount of the fire rescue services assessment for each subject parcel of property is as further set forth in Exhibit 2. The *Fire Rescue Assessment* shall be and is hereby imposed annually commencing October 1, 2009, and continuing each year thereafter until such time as changed or discontinued by the Board.

**Section 5.** The fire rescue services non-ad valorem assessment roll is hereby certified to the Tax Collector for collection in accordance with Florida law.

**Section 6.** This Resolution shall be effective upon adoption.

Done and adopted by the Board of County Commissioners of Leon County, Florida, this  
2nd day of September, 2014.

RESOLUTION NO. 13- 58**A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS RELATING TO THE PROVISION AND FUNDING OF FIRE RESCUE SERVICES.****RECITALS**

**WHEREAS**, the County desires to provide fire rescue services, facilities and programs, hereinafter "*fire rescue services*," in the most efficient manner possible in order to promote the health, safety and general welfare of its citizens; and

**WHEREAS**, the County desires to create a uniform financial mechanism for the funding of such *fire rescue services* to its citizens on an equitable basis; and

**WHEREAS**, on March 19, 2009, the Board of County Commissioners enacted an ordinance amending Chapter 7, Leon County Code of Laws, relating to the provision and funding of *fire rescue services*; and

**WHEREAS**, the City of Tallahassee and the County have entered into an Interlocal Agreement to administer the provision of *fire rescue services*; and

**WHEREAS**, the Interlocal Agreement by and between the City of Tallahassee and the County provides for the funding and payment for *fire rescue services* by means of the levy and collection of special assessments upon benefited *nongovernment property* and the imposition of fire rescue fee charges on *government property*; and

**WHEREAS**, the Board of County Commissioners desires to adopt a *fire rescue assessment rate resolution* and *fire rescue fee rate resolution* pursuant to Chapter 7, Leon County Code of Laws; and

**WHEREAS**, a rate study was performed on behalf of the City of Tallahassee and Leon County to determine the appropriate funding basis to support a *fire rescue charge*; and

**WHEREAS**, the findings, data and assumptions set forth in the rate study have been reviewed and reverified and it has been determined that the current *fire rescue charge* based upon the rate study remains reasonable, accurate and in accord with those requirements imposed under law for assessments and fees.

**NOW, THEREFORE, BE IT RESOLVED** by the Board of County Commissioners of Leon County, Florida, that:

**Section 1. Recitals.** The Recitals set forth above are deemed incorporated herein as if fully set forth below.

**Section 2. Authority.** This Resolution is adopted pursuant to the authority granted the County under Article VIII, Section 1, Florida Constitution, Chapters 125 and 170, Florida Statutes, the Leon County Charter, and other applicable provisions of law.

**Section 3. Definitions.** For purposes of this Resolution, the definitions contained in Section 7-39, Leon County Code of Laws, are incorporated herein by reference.

**Section 4. Resolution.** This Resolution shall constitute the *fire rescue assessment rate resolution* and the *fire rescue fee rate resolution* as described in Sections 7-42 and 7-43, Leon County Code of Laws.

**Section 5. Provision of Fire Rescue Services.** The County provides *fire rescue services* for the benefit of all parcels of improved property located within the unincorporated areas of the County effective October 1, 2009. All or a portion of the cost to provide such *fire rescue services* shall be funded from proceeds of the *fire rescue charge*.

**Section 6. Legislative Determinations.** It is hereby ascertained, determined, and declared that each parcel of property subject to a *fire rescue charge* located within the unincorporated area of the County shall be specially benefited by the County's provision of *fire*

*rescue services*, in an amount and to a degree not less than the *fire rescue charge* imposed against such parcel, and that such *fire rescue charge* as computed in a manner as set forth in this Resolution constitutes a fair and reasonable charge for the provision of *fire rescue services*. It is hereby further ascertained, determined, and declared that the *fire rescue cost* used to compute the *fire rescue charge* constitutes a reasonable estimation of the five-year average annual cost of providing *fire rescue services* to all parcels of improved property within the unincorporated areas of the County. Lastly, the *fire rescue charge* is based upon the City of Tallahassee/Leon County, Florida, Fire Assessment Memorandum dated June 2009 (“Rate Study”) which is hereby specifically approved and adopted as Exhibit A, same being attached hereto and incorporated herein as if fully set forth below, and the City of Tallahassee/Leon County Fire Assessment Memorandum dated October 17, 2013, (“Rate Study Update”) which is hereby specifically approved and adopted as Exhibit C, same being attached hereto and incorporated herein as if fully set forth below.

**Section 7. Fire Rescue Charge.**

**A. Fire Rescue Fee.** A fire rescue fee is hereby imposed upon each improved parcel of *government property* located within the unincorporated area of the County, and which is hereby ascertained, determined, and declared to be reasonably and fairly related to the cost of providing *fire rescue services* to such *government property* and as such the fire rescue fee constitutes a fair, reasonable, just, and equitable manner for apportioning and allocating the *fire rescue cost for government property*. The fire rescue fee imposed hereby is not a special assessment; it is a fee for services available and rendered to *government property*. The *fire rescue cost for government property* is further determined to be a reasonable estimation of a five-year average annual cost of providing *fire rescue services* to *government property*. The amount of the fire rescue fee

imposed upon *government property* for *fire rescue services* is specifically based upon the Rate Study, Exhibit A, and Rate Study Update, Exhibit C, established pursuant to and in accordance with Section 7-42, Leon County Code of Laws, and shall be as set forth in Exhibit B, Rate Schedule, same being attached hereto and incorporated herein as if fully set forth below, commencing October 1, 2009, annually until otherwise determined by the Board of County Commissioners.

**B. Fire Rescue Assessment.** A *fire rescue assessment* is hereby levied and imposed upon each improved parcel of *nongovernment property* located within the unincorporated area of the County, and which is hereby ascertained, determined, and declared to be reasonably related to the cost of providing *fire rescue services* and thereby provides an equitably corresponding special benefit to *nongovernment property*. The *fire rescue assessment* is hereby ascertained, determined and declared to be based upon a reasonable estimation of a five-year average annual cost of providing *fire rescue services* to such *nongovernment property*. It is further ascertained, determined and declared that the *fire rescue assessment* imposed hereby provides a special benefit to and is equitably apportioned among the *assessed property* based upon the special benefit assumptions and apportionment methodology set forth in the Rate Study, Exhibit A, and Rate Study Update, Exhibit C, established pursuant to and in accordance with Section 7-43, Leon County Code of Laws. The amount of the *fire rescue assessment* levied and imposed upon *nongovernment property* shall be as set forth in Exhibit B, Rate Schedule, commencing October 1, 2009, annually until otherwise determined by the Board of County Commissioners.

**Section 8. Exempt Property.** The *fire rescue assessment* heretofore imposed upon *nongovernment property* shall not be levied nor imposed against property owned or occupied by

a "religious institution" as that term is defined in Section 170.201(2), Florida Statutes, to the extent same is used as a place of worship.

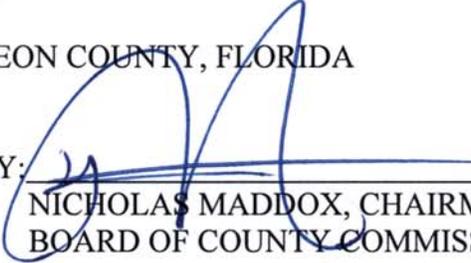

**Section 9. Collection of Fire Rescue Charge.** The collection of the *fire rescue charge* shall be made pursuant to and in accordance with Section 7-44, Leon County Code of Laws, and is authorized hereby, commencing October 1, 2009.

**Section 10. Effective Date and Applicability.** This Resolution shall have effect upon adoption and shall apply to all *assessed property, government and nongovernment property*, located within the unincorporated area of Leon County.

**DONE, ADOPTED AND PASSED** by the Board of County Commissioners of Leon County, Florida, this 29th day of October, 2013.

# Introduction

The City of Tallahassee (City) and Leon County (County) have entered into a professional services agreement with GSG to provide specialized services in the development and implementation of a non-ad valorem assessment program to fund fire services within the incorporated and unincorporated areas of the County (Fire Assessment Project).

The objective of this Fire Assessment Project is to develop and implement an update to the City's current revenue program capable of efficiently and effectively collecting all assessable and billable costs associated with providing fire services on an annual basis throughout the entire County for Fiscal Year 2009-10. The mechanism for collecting the Fire Fee from governmental properties will remain in effect, however both the City and County will utilize the City's utility bill as the collection method for all non-governmental properties where possible and the City will assist the County in the collection of the fire assessment utilizing both the utility bill and separate bills. This document is the Fire Assessment Memorandum (Assessment Memorandum), which is one of the project deliverables specified in the scope of services.

The work effort, documented by this Assessment Memorandum, focused on the calculation of assessment rates and classifications required to fully fund the identified assessable costs to provide fire services within the City and County for Fiscal Year 2009-10. However, the City and County have the choice of funding all or only a portion of the assessable costs based on policy direction. In addition, the work effort recorded in this Assessment Memorandum required the identification of the full costs of assessable fire services (net of all fire related revenues) and the allocation of those costs to properties that specially benefit from the provision of such fire services.

## BACKGROUND

In 1999, the City adopted a Fire Services Funding Program consisting of two components: a Fire Fee and a Fire Assessment. The goal of the Fire Services Funding Project in 1999 was to design an alternative revenue program capable of efficiently and effectively collecting all assessable and billable costs associated with providing fire services on an annual basis. The Fire Fee is the funding mechanism that secures recovery of the cost for providing fire services to governmental property. The Fire Assessment is the funding mechanism for non-government property that could be collected on the City's utility bill. The program was updated to account for changes in call data, property data and service delivery in Fiscal Year 2004-05.

Currently, fire services provided within the City are partially funded by an existing fire assessment program, and partially funded through the City's General Revenue Fund and a Fire Service Agreement with the County. The County currently funds the Fire Services Agreement in the unincorporated area through the use of the General Revenue.

The City and County have entered into an interlocal agreement that outlines a plan for functional consolidation of fire rescue services countywide. Included in this agreement are the additional personnel located in Stations 10-14. These additional resources will provide an improved response and improved safety for those personnel responding from those stations. A joint dispatch center will be constructed and dispatch for both the Tallahassee Fire Department and Leon County EMS will be consolidated into a joint dispatch unit. This enhancement will result in response efficiencies both in terms of response times and units dispatched to each incident.

## OBJECTIVES

The City and County retained GSG to develop an annual recurring special assessment program that is capable of funding all of the assessable costs associated with providing fire services. The City will utilize the utility bill for collection of the fire assessment and will assist the County in the collection of the fire assessment utilizing both the utility bill and separate bills. Data available on the ad valorem tax roll was used to develop the Fiscal Year 2009-10 assessment program. GSG has been charged to fully cost the services to be provided by the City and County, develop a fair and reasonable apportionment methodology for such assessable costs, and determine assessment rates and parcel classifications that are accurate, fair and reasonable.

The fire non-ad valorem assessments must meet the Florida case law requirements for a valid special assessment. These requirements include the following:

1. The service provided must confer a special benefit to the property being assessed; and
2. The costs assessed must be fairly and reasonably apportioned among the properties that receive the special benefit.

The work effort of this project required the evaluation of data obtained from the City and County to develop a fire assessment program that focuses upon the proposed Fiscal Year 2009-10 assessable cost calculations. The objectives of this initial effort were to:

- Determine the full costs of providing fire services within the City and County.
- Review such final cost determination with the City and County to determine which elements provide the requisite special benefit to the assessed properties.
- Determine the relative benefit anticipated to be derived by categories of property use within the County from the delivery of fire services.
- Recommend the fair and reasonable apportionment of assessable costs among benefited parcels within each category of property use.
- Calculate assessment rates and parcel classifications for Fiscal Year 2009-10 based on the Fiscal Year 2007-08 adopted budget adjusted for year over year increases.

# Service Description and Assessable Cost Calculations

The fire services apportionment methodology allocates assessable costs on the basis of the anticipated demand for fire services by categories of private, real property use as identified on the real property assessment roll prepared for the levy of ad valorem taxes. The assessable fire costs are allocated among private, real property use categories based upon the historical demand for these services. This demand is identified by examining the fire incident data as reported by the City to the State Fire Marshal's office.

The fire services apportionment methodology for governmental parcels allocates billable costs to provide fire services based upon the actual historical demand for these services by each government owner (ie. City, County, State, Federal, etc.), as reflected by the incident data reported by the City.

## SERVICE DELIVERY DESCRIPTION

The City Fire Rescue Department facilities inventory is comprised of 15 fire rescue stations and a training facility. The County's facility inventory consists of 5 volunteer fire stations. One of the volunteer stations is co-located at Station 15 and volunteer apparatus are located at stations 10 through 15. County EMS substations are co-located at city stations 12, 13 and 14. Table 1 identifies the City and County fire rescue buildings/facilities inventory, as well as the corresponding physical location address for the facility.

Source: City of Tallahassee/Leon County

The City of Tallahassee Fire Rescue Department provides standard fire suppression, medical services, hazmat response, technical rescue, airport capabilities, state disaster response, emergency response and disaster preparedness, fire prevention and safety education. There are five City stations that provide Advanced Life Support (ALS) services in coordination with Leon County EMS. The remaining ten stations provide Basic Life Support (BLS) services.

The City currently provides dispatch services for fire services and the County currently provides dispatch services for EMS services. However, the City and County have committed to creating a joint dispatch operation that is expected to begin in Fiscal Year 2010-11. Initial joint dispatch functions will be achieved through a temporary, virtual solution. This virtual dispatch solution will remain in place until a new joint dispatch facility is constructed and operations move to the new location. The target date for the completion of the joint dispatch facility is Fiscal Year 2011-12.

Tables 2 through 5 outline the Fire Rescue Department's current service operations and service components. Table 2 outlines the Fire Rescue Department's organizational structure.

**Table 2**

\* Pumping capacity for Station 5 is not included in total because those apparatus are dedicated to the airport.

The current pumping capacity is defined as the combined amount of water that all apparatus in the Fire Rescue Department can pump to a first alarm non-residential fire. As outlined by Table 4 above, the pumping capacity of the City's Fire Rescue Department is 47,950 gallons per minute. Accordingly, based on National Fire Protection Association fire fighting standards for fire-flow, the Fire Department currently

has sufficient fire-flow capacity to provide service coverage in the event of a structure fire involving unlimited square feet.<sup>1</sup> Table 5 details the Fire Rescue Department's response protocol.

## DEVELOPMENT OF FACTORS

### FIRE SERVICES V. EMERGENCY MEDICAL SERVICES

In June 2000, litigation over the City of North Lauderdale fire rescue assessment program resulted in a decision by the Fourth District Court of Appeals in the case of SMM Properties, Inc. v. City of North Lauderdale, (the "North Lauderdale" case). The Fourth District Court of Appeals concluded that Emergency Medical Services (EMS) did not provide a special benefit to property. The Court, however, reaffirmed that fire suppression, fire prevention, fire/building inspections and first response medical services do provide a special benefit to property. In August 2002, the Florida Supreme Court upheld the decision of the Fourth District Court of Appeals.

To address these concerns, GSG has developed a methodology that removes the costs associated with emergency medical services. The apportionment methodology only utilizes fire incident report data related to non-EMS calls.

The proposed Fiscal Year 2009-10 projected departmental costs were allocated between fire rescue and emergency medical services because of the Florida Supreme Court's opinion in City of North Lauderdale v. SMM Properties that emergency medical services (above the level of first response) does not provide a special benefit to property. Accordingly, the fire rescue costs were split from emergency medical service costs based on the following general guidelines.

<sup>1</sup> Source: National Fire Protection Association, "NFPA 1 Uniform Fire Code, 2006, Annex H, Table H, 5.1."

## DIRECT ALLOCATIONS

To the extent that certain line items could be allocated directly to fire, direct allocations were made. For example, all costs associated with "RR&I Transfer (Hydrant Replacement)," "Volunteer Fire Department," and "Airport Fire Protection" were allocated entirely to fire. All costs directly related to emergency medical services were removed entirely.

## ADMINISTRATIVE FACTOR

Certain line items were allocated between fire and EMS based on an Administrative Factor. This Administrative Factor is derived by creating a ratio between non-EMS or fire personnel and total combat personnel per shift. Because of the addition of six (6) combat positions to the City Fire Rescue Department that will be located at Stations 10 – 14 commencing October 1, 2009, the City's existing staffing pattern will be revised. These changes will allow the City, under optimal staffing, to operate with 69 non-EMS personnel and 11 EMS personnel, for a total of 80 combat personnel within the proposed funding timeframe (by Fiscal Year 2013-14). This optimal staffing yields an 86.3% percent non-EMS Administrative Factor.

This percentage was then applied to all applicable line items to allocate the costs that could not be directly allocated as fire costs or EMS costs, and that could not be operationally allocated (see below). For example, the Administrative Factor was applied to the personnel expenditures for salaries and benefits, and the line item expenditures for "Advertising," "Indirect Costs," "Human Resource Expense" and "Debt Service" to determine the fire service costs of these line items.

## OPERATIONAL FACTOR

Other assessable cost line items may also be allocated between fire and EMS based on an Operational Factor. The Operational Factor is derived by creating a ratio between non-EMS (i.e. fire) calls and EMS calls, and this ratio which is based on the City's Fire Rescue Department's operations, was then applied to certain budget line items such as "Gasoline" and "Vehicle Garage Expense".

To develop the Operational Factor, GSG obtained fire rescue incident data identifying the number of fire rescue calls made to property categories within the entire County over a one-year period. The City fire rescue incident data was used to determine the demand for fire rescue services. GSG obtained information from the City in an electronic format, identifying the number and type of fire rescue incident responses for calendar year 2007.

The State Fire Marshal's office uses the Florida Fire Incident Reporting System (FFIRS). This system is a tool for fire rescue departments to report and maintain computerized records of fire rescue incidents and other department activities in a uniform manner. Under this system, a series of basic phrases with code numbers are used to describe fire rescue incidents. Appendix A provides a codes list for the "type of situation found" as recorded on the fire rescue incident reports used to identify EMS and non-EMS calls.

The ratio between non-EMS (i.e. fire) calls and EMS calls is then applied to all applicable line items to allocate the costs that could not be directly allocated as fire costs or EMS costs, and that could not be administratively allocated. For calendar year 2007, the City reported 24,547 total fire rescue incident calls to FFIRS, of which 9,122 were non-EMS (i.e. fire) calls and 15,425 were EMS calls. This information results in a 37.16% non-EMS Operational Factor.

## ASSESSABLE COST CALCULATIONS

The fire services assessable cost calculations for Fiscal Years 2009-10 through 2013-14 are based on the following assumptions for the purpose of this Fire Assessment Memorandum.

- Unless more accurate information was available, a three percent annual increase was applied across all "Personnel Services" and all "Operating Expenditures." No increase was applied to revenues.
- Revenues are shown as a reduction of the total projected expenditures for each fiscal year, thereby reducing the total assessable costs for that year. Revenues are comprised of revenues directly received from or for the delivery of fire services, such as "Fire Inspection Fees," "Forfeited Discounts," "Firefighters Supplemental," and contract for service revenues that are allocated to the fire budget.
- All costs associated with providing contract services to the Tallahassee Regional Airport were included in the assessable budget with the corresponding contract revenues removed from the assessable budget calculations.
- The line item "Under Collection Rate for Separate Bill" and "Under Collection Rate for Utility Bill" under "Additional Costs" reflects a 95% collection rate of the Fire Services Assessment is a reserve for under collection.
- The line item "GSG Study/Annual/Update" under "Operating Expenditures" is the costs associated with the development of the initial assessment study as well as the recurring annual costs and update costs in year five. These costs are reimbursable through the assessment program.
- All costs associated with fire hydrant maintenance were provided by City staff. These costs were included as 100% fire costs and are reflected in each year's budget.
- Any payments historically exchanged between the City and County for fire services were not included in the assessable budget.
- The costs associated with providing an additional firefighter to each of the rural fire stations (10-14) were included in the assessable budget.
- The costs associated with supporting the volunteer fire departments were included as 100% fire costs and are included in the assessable budget.

Table 6 provides a calculation of the assessable costs for Fiscal Year 2009-10 based on an application of the above factors to the Fiscal Year 2008-09 Adopted Budget. The calculation yields an assessable cost of \$29,058,003 for Fiscal Year 2009-10.

# Determination of Fire Services Demand

## INCIDENT DATA

GSG obtained information from the City in an electronic format, identifying the number and type of fire rescue incident responses for calendar year 2007. The City uses the Florida Fire Incident Reporting System (FFIRS) to record its fire rescue incidents. The FFIRS is a tool for fire rescue departments to report and maintain computerized records of fire rescue incidents and other department activities in a uniform manner.

Under this system, a series of basic phrases with code numbers are used to describe fire rescue incidents. A data field in the FFIRS, "type of situation found," identifies the incident as an EMS or non-EMS type of call for each incident. Appendix A provides a code list for the "type of situation found" as recorded on the fire rescue incident reports used to identify EMS and non-EMS calls.

Another data field in the FFIRS, "fixed property use," identifies the type of property that fire rescue departments respond to for each fire rescue incident. The fixed property uses correlate to property uses determined by the Leon County Property Appraiser on the ad valorem tax roll. Appendix B provides a code list for the "fixed property use" as recorded on the fire rescue incident reports.

GSG analyzed the calendar year 2007-fire rescue incident data from the FFIRS files to evaluate trends and determine if aberrations were present. The fire rescue incident data for calendar year 2007 represents 24,625 fire rescue incidents. All fire rescue incidents were geo-coded to the addresses listed in the FFIRS reports. The geo-coding of calls identified those calls that were made to government owned properties.

Of the 24,625 fire rescue incidents, 78 incidents were duplicates and were removed. Of the remaining 24,547 fire rescue incidents, there were 15,425 incidents classified as EMS type incidents based on the type of situation found indicated on the incident report. The 15,425 EMS type incidents were not included in the analysis.

Of the remaining 9,122 fire type incidents, calls for certain situation found codes were omitted because they were not true incidents, or because they are accounted for under a separate agreement. For example, Station 5, located at the Tallahassee Regional Airport, is funded through a separate budget source. Accordingly, calls reported by Station 5 for runway checks, required by the Federal Aviation Authority, were omitted from the analysis. Additionally, some examples of the situation found codes that did not represent true calls for service were "public service," "alarm system activated/testing/maintenance," "training/academy" and "pre-fire planning." There were a total of 2,120 incidents with these type of situation found codes that were not included in the data set.

There are certain fire incidents that could not be assigned to a specific property or parcel. These calls represent non-specific type incidents, which are incidents that either could not be correlated to a specific parcel or calls that involved auto accidents and other types of incidents along roads and highways.

Of the 7,002 remaining fire type incidents, 5,224 were calls to specific property uses. The remaining 1,778 incidents were considered non-specific type incidents. Because of the inability to correlate these non-specific type incidents to specific property categories, the call analysis does not include these 1,778 incidents. Additionally, the level of services required to meet anticipated demand for fire services and the corresponding annual fire services budget required to fund fire services provided to non-specific property uses would be required notwithstanding the occurrence of any incidents from such non-specific property uses.

The suppression of fires on vacant land and agricultural property primarily benefits adjacent property by containing the spread of fire rather than preserving the integrity of the vacant parcel. Thus, incidents to vacant and agricultural property were not included in the final analysis of the fire call database. The 142 calls to these two property use categories were removed.

Of the remaining 5,082 fire type incidents, there were 662 calls for service to government properties as identified by addresses or fixed property use codes provided in the FFIRS reports. The costs associated with providing service to government properties was segregated and those government properties will fund fire service through a fee that is determined by the historical demand for service.

Table 8 outlines the property use category assignment of fire type incidents based on the analysis conducted by GSG.

**Table 8**  
**Fire Calls by Category (Calendar Year 2007)**

Property Category	Number of Fire Incidents	Percentage of Total Incidents
Single-Family Residential	2,146	42.23%
Multi-Family Residential	841	16.55%
Commercial	1,058	20.82%
Industrial/Warehouse	48	0.94%
Institutional	327	6.43%
College - FSU	182	3.58%

Educational - Lively Vo-Tech	7	0.14%
<b>Total</b>	<b>5,082</b>	<b>100.00%</b>

Source: City of Tallahassee/Leon County Fire Rescue Department (2007).

## PROPERTY DATA

GSG obtained information from the ad valorem tax roll from the Leon County Property Appraiser's office to develop the assessment roll. Each building within the City and the County on the ad valorem tax roll was assigned to one or more of the property use categories based on their assignment of use by the Leon County Property Appraiser or verification of use obtained through field research. A list of building improvement codes used by the Leon County Property Appraiser and their assignment to a property use category is provided as Appendix C.

The Single-Family Residential Property Use Category includes such properties as single-family dwelling units, duplexes and mobile homes. The Multi-Family Residential Property Use Category includes such

properties as triplexes, quadruplexes, apartments, condominiums, townhouses, and cooperatives. In the event the data was indefinite, the DOR codes were used to clarify mobile home categories and help identify condominium and townhouse buildings. For parcels assigned to the Single-Family Residential and Multi-Family Residential Property Use Categories, GSG utilized the total number of dwelling units as determined from the building files on the ad valorem tax roll or through the use of field research.

The Non-Residential Property Use Category includes commercial, industrial/warehouse, and institutional property uses. For parcels within the Non-Residential Property Use Categories (Commercial, Industrial/Warehouse and Institutional), GSG determined the amount of square footage of the structures using the building files on the ad valorem tax roll or through the use of field research.

For RV parks regulated under Chapter 513, Florida Statutes, in accordance with Sections 166.223 and 125.0168, Florida Statutes, which mandate that cities and counties treat RV parks like commercial property for non-ad valorem assessments levied by the City and County, each RV space within the park was treated as a building of commercial property and assigned the square footage of 191 square feet, the average size of a recreational vehicle, according to the Florida Association of RV Parks and Campgrounds.

# Computation of Fire Services Assessments

This section of the Memorandum includes the assessment rates as calculated within this Assessment Memorandum. The City and County fire rescue assessment cost calculations provided herein are primarily based on information supplied by the City and County. The assessable cost projections developed by GSG are designed to forecast assessment rates within each property use category for Fiscal Year 2009-10.

## SERVICE ZONES

Service zones were created to reflect the level of service differentiation of a property located in a higher density area that receives fire protection coverage from multiple stations compared a property located in an area generally described as rural and typically serviced by a single fire station. For this purpose, "core stations" were identified and defined as those stations within five road miles of at least two other stations. The creation of a core area was necessary to eliminate the appearance of a higher service level of those properties that may be within five road miles of two stations; however, the location of the property lies between two stations that are nearly ten miles apart.

Those properties included in "Zone 1" were generally located within five road miles of two "core stations." Properties located outside of five road miles of two "core stations" were included in "Zone 2." A map of the service zones is provided in Appendix E.

Calls were plotted, or "geocoded," on a map based upon the address provided in the FFIRS database. Those calls correlated to properties included in "Zone 1," and those calls correlated to properties included in "Zone 2," were aggregated and assigned to the respective zone. Table 9 details the assignment of calls to service zones.

**Table 9**  
**Fire Calls by Zones to Non-Governmental Properties (Calendar Year 2007)**

<b>Zone</b>	<b>Number of Calls to Specific Property Uses</b>
Calls to Zone 1 Properties	3,138
Calls to Zone 2 Properties	1,282

Using the fixed property use codes, the remaining 4,420 fire type incidents corresponding to specific properties were assigned to the following property use categories: single-family residential, multi-family residential, commercial, industrial/warehouse and institutional.

Table 10 outlines the property use category assignment of fire type incidents for non-governmental properties based on the historical demand for service in each zone.

**Table 10**  
**Fire Calls by Category to Non-Governmental Properties (Calendar Year 2007)**

Category	Zone 1		Zone 2	
	Number of Incidents	Percentage of Calls	Number of Incidents	Percentage of Calls
Single-Family Residential	1,050	33.5%	1,096	85.5%
Multi-Family Residential	806	25.7%	35	2.7%
Commercial	954	30.4%	104	8.1%
Industrial/Warehouse	36	1.1%	12	1.0%
Institutional	292	9.3%	35	2.7%
<b>Total</b>	<b>3,138</b>	<b>100.0%</b>	<b>1,282</b>	<b>100.0%</b>

Source: City of Tallahassee/Leon County Fire Rescue Department (2007).

## SPECIAL BENEFIT ASSUMPTIONS

The following assumptions support a finding that the fire services, facilities, and programs provided by the City and County provide a special benefit to the assessed parcels.

- Fire services, facilities, and programs possess a logical relationship to the use and enjoyment of property by: (i) protecting the value and integrity of improvements and structures through the availability and provision of comprehensive fire services; (ii) protecting the life and safety of intended occupants in the use and enjoyment of property; (iii) lowering the cost of fire insurance by the presence of a professional and comprehensive fire services program; and (iv) containing fire incidents occurring on land with the potential to spread and endanger other property and property features.
- The availability and provision of comprehensive fire services enhances and strengthens the relationship of such services to the use and enjoyment of the parcels of property, the market perception of the area and, ultimately, the property values within the assessable area.

## APPORTIONMENT METHODOLOGY

The following section describes the assessment apportionment methodology for fire services based on: (i) the fire services assessable cost calculations; (ii) the ad valorem tax roll maintained by the property appraiser and the availability of the data residing on the database; and (iii) the fire rescue incident data.

## COST APPORTIONMENT

The Fiscal Year 2009-10 assessable cost calculation was first apportioned among government and non-government property based upon the historical demand for service. The assessable costs attributable to non-government property was then apportioned among property use categories in each service zone based upon the historical demand for fire services reflected by the fire incident data experienced in each service zone for Calendar Year 2007. This apportionment is illustrated in Table 11.

**Table 11  
Cost Apportionment**

Category	Zone 1			Zone 2		
	Total Calls	Percentage	Assessable Costs	Total Calls	Percentage	Assessable Costs
Residential	1,050	33.5%	\$6,138,709	1,096	85.5%	\$6,407,643
Multi-Family	806	25.7%	\$4,712,190	35	2.7%	\$204,624
Commercial	954	30.4%	\$5,577,456	104	8.1%	\$608,025
Industrial/Warehouse	36	1.1%	\$210,470	12	1.0%	\$70,157
Institutional	292	9.3%	\$1,707,146	35	2.7%	\$204,624
<b>Total</b>	<b>3,138</b>	<b>100.0%</b>	<b>\$18,345,970</b>	<b>1,282</b>	<b>100.0%</b>	<b>\$7,495,071</b>

## PARCEL APPORTIONMENT

The share of the assessable costs apportioned to each property use category was further apportioned among the individual buildings of property within each property use category in the manner described in Table 12.

**Table 12  
Parcel Apportionment within Property Use Categories**

Category	Parcel Apportionment
Single - Family Residential	Dwelling Unit
Multi - Family Residential	
Non-Residential	Improvement Area Per Building Within Square Footage Ranges
-Commercial	
-Industrial/Warehouse	
-Institutional	

Applying the foregoing parcel apportionment methodology, fire assessment rates were computed for each property use category. The specific methodology, underlying special benefit and fair apportionment assumptions are included below and generally described.

## RESIDENTIAL PARCEL APPORTIONMENT ASSUMPTIONS

The following assumptions support findings that the parcel apportionment applied in the Residential Property Use categories are fair and reasonable. The Residential Property Use Categories includes such properties as single-family dwelling units and multi-family dwelling units.

- The size or the value of the residential parcel does not determine the scope of the required fire services. The potential demand for fire services is driven by the existence of a dwelling unit and the anticipated average occupant population.
- Apportioning the assessable costs for fire services attributable to the residential property use category on a per dwelling unit basis is required to avoid cost inefficiency and unnecessary administration, and is a fair and reasonable method of parcel apportionment based upon historical fire call data.

## RESIDENTIAL PARCEL APPORTIONMENT CALCULATION

Based upon the historical demand for fire services, the percentages of assessable costs attributable to residential properties were calculated. The amount of the assessable costs allocable to each residential property was divided by the number of dwelling units in the respective Residential Property Use Category to compute the fire assessment to be imposed against each dwelling unit. For each residential parcel, the actual number of dwelling units located on the parcel will be multiplied by the residential dwelling unit rate to compute the residential fire assessment amount for the parcel.

Table 13 illustrates the assignment of dwelling units under this apportionment methodology to the Residential Property Use Category for each zone.

**Table 13**  
**Parcel Apportionment Residential Property Use Category**

Residential Property Use Category	Number of Dwelling Units-Zone 1	Number of Dwelling Units-Zone 2
Single-Family Dwelling Units	34,375	39,866
Multi-Family Dwelling Units	37,938	4,837

Source: Leon County Property Appraiser (2007).

## NON-RESIDENTIAL PARCEL APPORTIONMENT ASSUMPTIONS

The Non-Residential Property Use category includes commercial, industrial/warehouse, and institutional property uses. The capacity to handle fires and other emergencies in Non-Residential Property Use category is governed by the following:

- The current pumping capacity is defined as the combined amount of water that all apparatus in the Fire Department can pump to a non-residential fire. As outlined by Table 4 above, the pumping capacity of the Fire Department is 47,950 gallons per minute. Accordingly, based on National Fire Protection Association fire fighting standards for fire flow, the Fire Department currently has sufficient fire flow capacity to provide service coverage in the event of a fire involving significant to unlimited square footage.<sup>2</sup> To avoid inefficiency and unnecessary administration, the City and County have elected to use 14 classifications, with a maximum classification of over 100,000 square feet. This application has no material impact on the non-residential parcel apportionment.

The following assumption supports findings that the parcel apportionment applied in the Non-Residential Property Use category is fair and reasonable.

- The risk of loss and demand for fire services availability is substantially the same for structures below a certain minimum size. Because the value and anticipated occupancy of structures below a certain minimum size is less, it is fair, reasonable, and equitable to provide a lesser assessment burden on such structures by the creation of a specific property parcel classification for those parcels.
- The separation of non-residential buildings into square footage classifications is fair and reasonable for the purposes of parcel apportionment because: (i) the absence of a need for precise square footage data within the ad valorem tax records maintained by the property appraiser undermines the use of actual square footage of structures and improvements within each improved building as a basis for parcel apportionment; (ii) the administrative expense and complexity created by an on-site inspection to determine the actual square footage of structures and improvements within each improved parcel assessed is impractical; and (iii) the demand for fire services availability is not precisely determined or measured by the actual square footage of structures and improvements within benefited parcels; and (iv) the classification of buildings within square footage ranges is a fair

<sup>2</sup> Source: National Fire Protection Association, "NFPA 1 Uniform Fire Code, 2006, Annex H, Table H, 5.1"

and reasonable method to classify benefited parcels and to apportion costs among benefited buildings that create similar demand for the availability of fire services.

The parcel apportionment for each Non-Residential Property Use Classification shall include both minimum building classifications and an additional classification of all other buildings based upon the assumed square footage of structures and improvements within the improved parcel. The Non-Residential Property Use Classifications include Commercial, Industrial/Warehouse and Institutional. The following describes the Non-Residential Property parcel apportionment calculation and classification for the Commercial, Industrial/Warehouse and Institutional categories.

## NON-RESIDENTIAL PARCEL APPORTIONMENT CALCULATION

Based upon the historical demand for fire services, property in the Non-Residential Property Use categories will be responsible for funding a percentage of assessable costs. The amount of the assessable costs allocable to buildings within each of the Non-Residential Property Use Classifications was calculated based upon the following building classifications.

- Non-residential buildings with square footage of non-residential improvements less than 1,999 square feet were assigned an improvement area of 1,000 square feet per building. Buildings with square footage of non-residential improvements between 2,000 square feet and 3,499 square feet were assigned an improvement area of 2,000 square feet per building. Buildings with non-residential improvements between 3,500 square feet and 4,999 square feet were assigned an improvement area of 3,500 square feet per building. Buildings with non-residential improvement areas between 5,000 square feet and 9,999 square feet were assigned an improvement area of 5,000 square feet per building. For buildings containing non-residential improvements between 10,000 square feet and 99,999 square feet, assignments of improvement area were made in 10,000 square foot increments.
- For buildings, containing non-residential improvements over 99,999 square feet, an assignment of improvement area of 100,000 was made.

Sections 125.0168 and 166.223, Florida Statutes, relating to special assessments levied on recreational vehicle parks regulated under Chapter 513, Florida Statutes require the following:

- When a city or county levy a non-ad valorem special assessment on a recreational vehicle park regulated under Chapter 513, the non-ad valorem special assessment shall not be based on the assertion that the recreational vehicle park is comprised of residential units. Instead, recreational vehicle parks regulated under Chapter 513 shall be assessed as a commercial entity in the same manner as a hotel, motel, or other similar facility.

Table 14 illustrates the assignment of improvement area under this apportionment methodology for the Commercial, Industrial/Warehouse and Institutional categories.

**Table 14**  
**Fire Services Assessment Parcel Apportionment (Non-Residential Property Use Category)**

Square Foot Tiers	Number of Commercial Buildings		Number of Industrial/Warehouse Buildings		Number of Institutional Buildings	
	Zone 1	Zone 2	Zone 1	Zone 2	Zone 1	Zone 2

Source: City of Tallahassee/Leon County Fire Rescue Department (2007).

Because the suppression of fires on vacant land and agricultural property primarily benefits adjacent property by containing the spread of fire rather than preserving the integrity of the vacant parcel, incidents to vacant and agricultural property were not included in the final analysis of the fire call database. Therefore, only the primary structures on vacant and agricultural parcels will be charged.

## FIRE ASSESSMENT RATES

Applying the parcel apportionment methodology, fire services assessment rates were computed for each specified property use category. Based on the assessable costs of providing fire services, the number of fire calls apportioned to specific property categories and the number of billing units within the specified property categories.

Table 15 illustrates the assessment rates after application of the assessment methodology based on 100 percent funding of the total assessable costs for Fiscal Year 2009-10.

**Table 15**  
**Fire Services Assessment Rates (Funding Generates \$27,813,187 Net Revenues)**

<b>Residential Property Use Categories</b>		<b>Zone 1 - Rate Per Dwelling Unit</b>	<b>Zone 2 - Rate Per Dwelling Unit</b>

## EXEMPTIONS AND IMPACT OF EXEMPTIONS

Because the fire services assessment is being developed to meet the case law standards for a valid special assessment, any proposed exemptions require special scrutiny. The crafting of an exemption must be founded upon a legitimate public purpose, and not trample on state or federal constitutional concepts of equal protection and constitutional prohibitions against establishment of religion or the use of the public treasury directly or indirectly to aid religious institutions. Furthermore, to ensure public acceptance, any exemption must make common sense and be fundamentally fair. Finally, the impact of any proposed exemption should be evaluated in terms of its magnitude and fiscal consequences on the City and County's general funds respectively.

Whenever crafting an exemption, it is important to understand that the fair apportionment element required by Florida case law prohibits the shifting of the fiscal costs of any special assessment from exempt landowners to other non-exempt landowners. In other words, the funding for an exemption from a special assessment must come from a legally available external revenue source, such as the City and County's general funds. Funding for fire assessment exemptions cannot come from the proceeds derived directly from the imposition of special assessments for fire services and facilities. Because any exemption must be funded by an external funding source, the grant of any exemption will not have any impact upon the fire assessment to be imposed upon any other non-exempt parcels.

The decision of the City and County to fund exemptions for fire services assessments on property owned by non-governmental entities is based upon the determination that such exemptions constituted a valid public purpose.

Table 17 summarizes the estimated percentage annual impact of exempting institutional, wholly tax-exempt property.

**Table 17**  
**Estimated Percentage Impact of Exemptions**

<b>Financial Classification</b>	<b>Amount</b>
Estimated Assessable Costs	\$29,711,351
Estimated Buy-down for Institutional Tax-Exempt Building Uses	\$1,272,804
Estimated Revenue Generated	\$28,438,547

# Fire Services Fees Imposed on Governmental Property

The special benefit and fair and reasonable apportionment requirements for a valid special assessment do not rigidly apply to charges against government property. Florida case law has stated that user fees are paid by choice and are charged in exchange for a particular governmental service, which benefits the property paying the fee in a manner not shared by other members of the public. In the user fee context, choice means that the property paying the fee has the option of not using the governmental service and thereby avoiding the charge. Under such tests and definition of choice, the validity of both impact fees and stormwater fees have been upheld.

Impact fees are imposed to place the economic burden of infrastructure required by growth on new development. Stormwater fees are imposed to control and treat the stormwater burden generated by the use and enjoyment of developed property. Likewise, fire services provided by the City and County are intended to meet the historical demand for fire services from developed property and such fee benefits the owner or user of developed property in a manner not shared by other members of society (e.g., the owner of undeveloped property).

The Florida Attorney General has recognized that state-owned property is not required to pay a special assessment without legislative authorization but that such authorization is not needed for user fees or service charges. Additionally, a valid charge cannot be enforced by a lien against public property absent elector approval. Rather, the enforcement remedy is a mandamus action to compel payment. In addition, certain general laws preempt the home rule power of local governments to impose special assessments on educational institutions.

The methodology used in structuring the Fire Services Fee billed to governmental property has been structured to recognize the different legal requirements for special assessments and for fees and in recognition of the following assumptions:

- Fire services benefit owners of property that choose to improve and develop their property by: (i) protecting the value of the improvements and structures by providing available fire control services; (ii) protecting the life and safety of intended occupants in the use and enjoyment of improvements and structures within improved parcels; (iii) lowering the cost of fire insurance by the presence of a professional and comprehensive fire control program; and (iv) containing the spread of fire incidents occurring on vacant property with the potential to spread and endanger the structures and occupants of improved property.
- The combined fire services of the City and County under its existing consolidated fire services program enhances and strengthens the relationship of such services to the use and enjoyment of the structure and improvements on improved and developed parcels of property within the County.
- Calculating the amount of the Fire Services Fee for each classification of governmental owner based upon its actual, historical demand for fire services is fair and reasonable and is in recognition of the benefit anticipated to be provided to the owner of the governmental property.

As discussed previously and documented in the "Incident Data" section of this document, the fire services incidents were analyzed to determine the fire services demand for all governmental property and for each owner. The proportionate share of the billable costs for each owner of governmental property was then applied to the total billable costs attributed to the government property classification to determine the Fire Services Fee for each owner.

Table 18 details the breakdown of the calls for service to government properties including calls in the City and County and the percentages of those calls respectively.

**Table 18**  
**Government Call Breakdown**

# Collection Method for Special Assessments

## **UTILITY BILL COLLECTION METHOD FOR SPECIAL ASSESSMENTS**

One method of collection available to local governments is to use an existing utility bill. The City of Tallahassee currently collects its Fire Services Assessment via the existing utility bill. In the unincorporated areas of the County, some of the parcels receive some form of City utilities, which can include electricity, water, gas, sewer or some combination thereof.

The greatest challenge with using the utility bill is to correlate the utility account with the parcel number maintained by the Property Appraiser. This process is detailed and time-consuming because utilities are not billed according to parcel identification numbers – they are billed according to account numbers, which may or may not correlate to a single parcel number. In some cases, one parcel may have multiple utility accounts based on the number of businesses or residents. In those cases, bills will be issued to each utility account holder based on their occupied portion of the total parcel.

## **SEPARATE BILL COLLECTION METHOD FOR SPECIAL ASSESSMENTS**

A separate bill is the other mechanism available to the County because the County has no utility billing system at its disposal. The greatest disadvantage to the separate bill collection method is that the collection rate tends to be lower than when the charge appears on the tax bill or a utility bill. Local governments may, however, file a lien against properties with delinquent charges. Minimal adjustments were made to account for the anticipated under collections of using a separate bill to collect assessments.

The County and City have agreed that the City will bill and collect from property owners in the unincorporated area of the County that have City utility accounts using the utility bill. The City will identify the property owners within the County that do not receive a City utility bill and provide a separate quarterly bill for the Fire Services Assessment charges. The administration of this billing methodology will require vigilance to ensure all properties required to pay the assessment are correctly billed, and that those property owners that receive a utility bill are not doubled billed.

# Additional Information

## EXEMPTION CALCULATIONS

GSG utilized the most current data to identify institutional, tax-exempt parcels within the City and County in order to calculate the aggregate cost ('buy down') of these parcels. In addition, best efforts were made by GSG to reconcile any differences necessary to calculate the estimated buy down for this exemption category. Missing or incorrect property data could affect the estimated aggregate costs.

## NON-SPECIFIC CALLS

In the fire call analysis, certain fire related calls were classified as non-property specific, because of the location of occurrence in the incident report. These calls represent non-specific incidents that either could not be correlated to a specific parcel or involved auto accidents or other types of incidents along roads and highways. These calls are excluded from the analysis that determines the percentage of calls for service to respective property types and therefore, are not considered in the determination of the extent of budget required to fund the department. Because the budget is established based on the ability of the department to adequately protect structures, no adjustment has been made to the budget due to non-property specific calls.

## MOBILE HOME AND RECREATIONAL VEHICLE PARK VACANCY CREDIT

As a consequence of the transient use and potential extraordinary vacancies within mobile home and recreational vehicle (RV) parks as compared to other residential property and the lack of demand for fire services for unoccupied spaces, it is fair and reasonable to provide for an extraordinary vacancy adjustment procedure for mobile home and RV park properties. Vacant mobile home and RV spaces within a mobile home or RV park will be charged; however, these properties will be eligible for an extraordinary vacancy adjustment for vacant mobile home or RV spaces.

## VERIFICATION OF SQUARE FOOTAGE OF STRUCTURES ON TAX-EXEMPT PARCELS

The ad valorem tax roll provides the data required to determine value. So long as properties remain in the name of owners exempt from ad valorem taxation, the property appraiser may not consistently maintain data related to building improvements on such parcels. As a consequence of such data imperfections, the square footage on some of the parcels, particularly for institutional private sector classifications, may not be complete. The City of Tallahassee Fire Department staff has assisted GSG in verifying square footage information for many parcels of property within the City and County.

## BILLING PROPERTIES WITH MULTIPLE UTILITY ACCOUNTS

The proposed methodology can determine the assessment rate per building on a tax parcel. However, for some non-residential properties there may be many utility accounts assigned to a building. When utilizing the utility bill to collect the Fire Services Assessment, a considerable amount of data collection will be necessary to assess each utility account assigned to the building.

October 17, 2013

Mr. Alan Rosenzweig  
Deputy County Administrator  
Leon County Florida  
301 South Monroe Street  
Tallahassee, Florida 32301

**City of Tallahassee/Leon County Fire Assessment Memorandum (October 17, 2013)**

Dear Mr. Rosenzweig,

Government Services Group, Inc. (GSG) was retained by Leon County (County) to determine if the current 5 year average (Fiscal Year 2009-10 through 2013-14) fire assessment rates based on the Fire Assessment Fee Study that was conducted by GSG in 2008-09 are still reasonable, accurate and legally defensible for the Fiscal Year 2014-15, fire assessment rates.

In order to accomplish this GSG had to complete the following tasks:

- Create an estimated Fiscal Year 2014-15 assessable budget.
- Use the estimated Fiscal Year 2014-15 assessable budget along with the original five year average budget to create an estimated six year average assessable budget.
- Ensure that the newly created 6 year average assessable budget was not significantly different than the original 5 year average assessable budget.

**ANALYSIS**

The estimated assessable budget for Fiscal Year 2014-15, as calculated by GSG, is based on the following:

- The same overall approach, structure and process that was used to calculate the assessable budget as developed in the 2008-09 study.
- The same calculation and/or application of the factors used to calculate the assessable budget as developed in the 2008-09 study.
- Inclusion of the costs of the same additional fire related items (Fire Hydrant Maintenance, Additional Personnel, Utility Service Costs, Indirect Costs, Undercollections for the Utility Bill and Separate Bill, etc.) that may not have been captured in the City of Tallahassee Fire Services Fund and as developed in the 2008-09 study.

GSG estimated the Fiscal Year 2014-15 assessable budget based on the above listed items and the Fiscal Year 2014 City of Tallahassee Fire Services Fund Budget. Table 1 provides a summary of the estimated Fiscal Year 2014-15 assessable budget.

Mr. Alan Rosenzweig  
October 17, 2013  
Page 2

**Table 1**  
**Estimated Fiscal Year 2014-15 Assessable Budget**

	<b>FY 14/15 Budget</b>	<b>FY 14/15 Assessable Budget</b>
Personnel Services	\$21,618,807	\$18,774,080
Operating Expenditures	\$11,761,218	\$9,929,258
Capital Outlay	\$200,000	\$172,500
<b>Total Expenditures</b>	<b>\$33,580,025</b>	<b>\$28,875,838</b>
Revenues	\$476,382	\$476,382
<b>Total Net Expenditures before Additional Costs</b>	<b>\$33,103,643</b>	<b>\$28,399,456</b>
Total Additional Costs		\$1,925,645
<b>Total Assessable Costs</b>		<b>\$30,325,101</b>

GSG then created a 6 year average budget based on the original 5 year average budget (Fiscal Year 2009-10 through 2013-14) with the addition of the estimated Fiscal Year 2014-15 assessable budget as provided in Table 2.

**Table 2**  
**Six- Year Average Assessable Budget (Fiscal Year 2009-10 through 2014-15)**

<b>FY 09/10 Assessable Budget</b>	<b>FY 10/11 Assessable Budget</b>	<b>FY 11/12 Assessable Budget</b>	<b>FY 12/13 Assessable Budget</b>	<b>FY 13/14 Assessable Budget</b>	<b>Estimated FY 14/15 Assessable Budget</b>	<b>6 Year Average Assessable Budget</b>
\$29,058,003	\$27,999,566	\$29,565,216	\$30,455,098	\$31,478,874	\$30,325,101	\$29,813,643

## RESULTS

The current Fiscal Year 2013-14 and anticipated Fiscal Year 2014-15 fire assessment rates are based on the 5 year average assessable budget of \$29,711,351.

Table 3 provides a comparison of the original 5 year average assessable budget and the estimated 6 year average assessable budget.

**Table 3**  
**Budget Comparison**

<b>5 Year Average Assessable Budget</b>	<b>6 Year Average Assessable Budget</b>	<b>Net Increase or Decrease</b>
\$29,711,351	\$29,813,643	\$102,292

Based on the above analysis and the results shown in Table 3, GSG has concluded that the fire assessment rates based on the Fire Assessment Fee Study that was conducted by GSG in 2008-09 are still reasonable, accurate and legally defensible for Fiscal Year 2014-15.

If you would like to further discuss this analysis, or any other related questions, please feel free to contact me at (850) 681-3717 or [ctharpe@govserv.com](mailto:ctharpe@govserv.com).

Sincerely,

Camille P. Tharpe  
Senior Vice President
