

UPGRADE LEON CONTRACTOR TRAINING BEGINS

Upgrade Leon, a new program brought to you by Leon County in partnership with Ygrene Energy Fund, will be launching soon. Commercial building owners located in Leon County will have access to 100% financing for energy efficiency, renewable energy, and wind hardening upgrades to their property. This voluntary financing is repayable over the long term through their property taxes.

Upgrade Leon's innovative approach unlocks massive job creation and brings economic stimulus and environmental benefit to the region.

We're thrilled to announce that introductory contractor training dates are set!
